Section E (Tile Calculations)

For Moment based tile systems, choose Method 1. Compare the values for M_r with the values from M_f. If the M_f values are greater than or equal to the M_r values for each area of the roof, then the tile attachment method is acceptable.

Method 1 "Moment Based Tile Calculations per RAS 127"

Enter positive uplift pressures when using this table

Zone 1: (_____ x λ: _____) = _____ - *Mg*: _____ = *Mr1*: _____ Product approval Mf: _____

Zone 2: (_____ x λ: _____) = _____ - *Mg*: _____ = *Mr2*: _____ Product approval Mf: _____

Zone 3: (_____ x λ: _____) = _____ - *Mg*: _____ = *Mr3*: _____ Product approval Mf: _____

Tile Attachment Method: _____ Alternate Tile Attachment Method: _____

Method 3 *"Uplift Based Tile Calculations per RAS 127"*

Enter positive uplift pressures when using this table

For Uplift Based tile systems use Method 3. Compare the values for F' with the values for Fr. If the F' values are greater than or equal to the Fr values for each area of the roof, then the tile attachment method is acceptable.
