Lauderdale By The Sea, FL, 33308

Reference: Phase I Environmental Site Assessment
Proposed North Bay Village Building
7914, 7916 and 7918 West Drive
North Bay Village, Miami-Dade County, Florida
UES Project No. 2140.1700014.0000
UES Report No. E00117

Dear Mr. Pejoves.

Universal Engineering Sciences, Inc. (UES) has completed a Phase I Environmental Site Assessment (ESA) in compliance with the American Society for Testing and Materials (ASTM) Standard E1527-13 for the above-referenced site (the "subject property"). The purpose of this assessment was to identify recognized environmental conditions (RECs) in association with the subject property as defined in ASTM E1527-13. Based on the conclusions of the Phase I ESA, UES has identified a REC associated with the subject property. Therefore, UES recommends further assessment of the subject property at this time. Further details regarding the Phase I ESA conducted by UES are presented in the attached report.

Continuing Obligations

The User of this report is required to ensure that continuing obligations are followed after purchase or acquisition of the subject property. Any land use restrictions in effect at the subject property must be maintained. The User should ensure that all parties at the subject property are following best management practices and taking "reasonable steps" with respect to preventing and limiting exposure to any hazardous substance releases on the subject property. In the event of a future release on the subject property, the property owner or responsible party should report it to the appropriate regulatory agency. Full cooperation must be provided to any parties authorized to conduct assessments or responses to the subject property.

Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

Universal Engineering Sciences, Inc. appreciates this opportunity to provide environmental services to you and we look forward to future endeavors. Please contact the undersigned if you have any questions regarding this report.

Respectfully submitted,
Universal Engineering Sciences, Inc.

EXECUTIVE SUMMARY

Universal Engineering Sciences, Inc. (UES) has completed a Phase I Environmental Site Assessment (ESA) in compliance with the American Society for Testing and Materials (ASTM) Standard E1527-13 for the property located at 7914, 7916 and 7918 West Drive in North Bay Village, Miami-Dade County, Florida (the "subject property"). The purpose of this assessment was to identify recognized environmental conditions in association with the subject property as defined in ASTM E1527-13. The subject property evaluated for this Phase I ESA consisted of the following Miami-Dade County Property Appraiser's Folio Number 23-3209-001-0160. The subject property is 0.77 acres in size and is currently vacant land with asphalt parking spaces along the east side of the subject property. UES understands this Phase I ESA is being performed in association with the potential redevelopment of the subject property. Please refer to the Site Location Map presented in **Appendix A-1** and the Site Plan/2016 Aerial Photograph presented in **Appendix A-2** for additional information pertaining to the location of the subject property.

NOTE: Please carefully review this report in its entirety for a full description of our evaluation procedures and findings.

Based on UES' field observations, historical research, public records review and interviews conducted in accordance with ASTM format E1527-13, the findings of this Phase I ESA are as follows:

1. UES reviewed aerial photographs, Sanborn Fire Insurance Maps, EDR provided city directories and property records to determine the historical use of the subject property. The subject property appeared to be developed with at least one apartment building in 1949 (7918 West Drive). By 1951, an additional apartment building occupied the subject property (7914 West Drive). Sometime prior to 1958, a third apartment building was constructed on the subject property addressed as 7916 West Drive. The subject property remained developed with three apartment buildings until sometime prior to 2007, when the apartment buildings were razed. The subject property is currently vacant land with partially constructed building footings.
2. During site reconnaissance, UES observed dumped material in the onsite excavation pit. The dumped material including paint cans and motor oil. Based on the surficial observations of hazardous materials, additional hazardous materials may also be present within the excavation area that are inaccessible or unobservable to UES. Therefore, it is UES' opinion that the dumped material represents a REC.
3. UES observed oil staining on the asphalt parking lot on the east side of the subject property. The staining appears to be from vehicular oil from the parking lot users. The asphalt was observed to be in good condition and therefore, the staining represents a *de minimis* condition.

Based on the conclusions of the Phase I ESA, UES identified a REC associated with the subject property. Based on the identification of a REC, it is UES' opinion that further assessment is warranted at this time.

The User of this report is required to ensure that continuing obligations are followed after purchase or acquisition of the subject property. Any land use restrictions in effect at the subject property must be maintained. The User should ensure that all parties at the subject property are following best management practices and taking "reasonable steps" with respect to preventing and limiting exposure to any hazardous substance releases on the subject property. In the event of a future release on the subject property, the property owner or responsible party should report it to the appropriate regulatory agency. Full cooperation must be provided to any parties authorized to conduct assessments or responses to the subject property.

Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

1.0 INTRODUCTION

1.1 PURPOSE

Universal Engineering Sciences, Inc. (UES) has completed a Phase I Environmental Site Assessment (ESA) for the property located at 7914, 7916 and 7918 West Drive in North Bay Village, Miami-Dade, Florida (the "subject property") and identified with the following Miami-Dade County Property Appraiser Folio 23-3209-001-0160. The primary purpose of this assessment is to conduct an evaluation of the subject property and surrounding properties to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), *de minimis* conditions, vapor encroachment conditions (VECs), and business environmental risks (BERs) associated with the past or present uses of the subject property and surrounding properties. ASTM E1527-13 defines these conditions as follows:

- REC: the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; (3) under conditions that pose a material threat of a future release to the environment.
- CREC: a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority. The hazardous substances or petroleum products are allowed to remain in place and are subject to the implementation of required controls.
- HREC: a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- *De minimis* Condition: a condition that generally does not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.
- VEC: the presence or likely presence of "chemical of concern" vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property as identified by the Tier 1 or Tier 2 procedures.
- BER: a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

This environmental assessment was conducted in accordance with the guidelines of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This assessment was also intended to identify potential off-site contaminant sources within the distances set forth in ASTM E1527-13 guidelines.

Methodology followed good commercial and customary practice with a goal to identify RECs that would be subject to an enforcement action if brought to the attention of appropriate government agencies.

1.2 DETAILED SCOPE OF SERVICES

The contracted scope of services consists of the preparation of a Phase I ESA of the subject property in accordance with the guidelines set forth in ASTM E1527-13. The accuracy, correctness and completeness of this Phase I ESA is provided with knowledge of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as set forth in 42 United States Code Section 9601 et seq., as amended.

The scope of services does not include an evaluation of asbestos containing building materials, lead based paint, lead in drinking water, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, indoor air quality, radon, vapor intrusion, site geotechnics (soils, foundations, site retention, etc.), wetlands, endangered species, or construction materials testing, unless specified in the approved contract between UES and the client. UES can provide these additional services if necessary.

1.3 LIMITATIONS AND EXCEPTIONS

The findings of this report represent our professional judgment; UES offers or extends no warranty, express or implied. These findings are relevant to the dates of our property inspection and the information cited herein. This report should not be relied upon to represent property conditions on other dates or at locations other than those specifically cited within the report. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the subject property.

Due to changing environmental regulatory conditions and potential on-site or adjacent activities occurring after this Phase I ESA, the client may not presume the continuing applicability to the subject property of the conclusions in this assessment for more than 180 days after the report's issuance date, per ASTM E1527-13.

1.4 DATA GAPS

ASTM E1527-13 defines a "Data Gap" as a lack of, or inability to, obtain information despite good faith efforts that may affect the findings of the Phase I ESA. The Environmental Professional is to identify "*significant*" Data Gaps found in the Phase I ESA process, while "*insignificant*" Data Gaps do not have to be included in this evaluation. For both the ASTM Standard and the AAI Final Rule, the Environmental Professional must identify what was done to address the Data Gap. The Environmental Professional should provide an opinion regarding appropriate further investigations, if any, necessary to address Data Gaps. A Phase I ESA which includes Data Gaps is still considered as compliant with the Standard and the AAI Final Rule, as long as the Data Gaps are addressed as outlined above.

The following Data Gaps were encountered during completion of this Phase I ESA:

- Data gaps were encountered in the historical records review due to the lack of available sources (city directories, aerial photographs and Sanborn Fire Insurance Maps) in five year intervals back to 1940. Historical sources were only available back to 1949 for the subject property. Based on our review of available information and that the subject property was developed with an apartment building, this data gap does not appear to be significant to the findings of this report and do not appear to constitute a data failure.
- No User Questionnaire for the subject property was returned by the time of publication of this Phase I ESA report; however, UES interviewed Mr. Maurizio Pejoves, Owner of the subject property. Based on available historical aerial photographs, city directories, fire insurance maps, government records and interview documentation, this Data Gap does not appear to be significant to the findings of this assessment and does not constitute a data failure. The User should obtain completed questionnaires from the owners to be compliant with the ASTM Standard Practice E 1527-13 and be afforded CERCLA protection for this assessment.
- The chain-of-title documentation or recorded land title records, environmental liens, and activity and use limitations records were not provided to UES for review during this Phase I ESA. However, the User should obtain these records to be compliant with the ASTM Standard Practice E 1527-13 and be afforded CERCLA protection for this assessment. If the User does not obtain these records, this Data Gap could be considered significant to the findings of this assessment and could constitute a data failure.
- At the issuance of this report, a response from the City of North Bay Village Public Utilities, the Florida Department of Health and Miami-Dade County Fire Rescue Department were not received.

- The asphalt parking lot located along the eastern portion of the subject property were in use at the time of UES' site visit. Therefore, UES was only able to observe vacant parking spaces.

1.5 SPECIAL TERMS AND CONDITIONS

This report, and the information contained herein, shall be the sole property of UES until payment of any unpaid balance is made in full. P&O Technologies, hereinafter referred to as the "User" of this Phase I ESA report, agrees that until payment is made in full, the User shall not have a proprietary interest in this report or the information contained herein. UES shall have the absolute right to request the return of any and all copies of this report submitted to other parties, public or private, on behalf of the User in the event of nonpayment of outstanding fees by the UES General Conditions that govern this assessment (**Appendix B**).

1.6 USER RELIANCE

This report is intended for the sole use of P&O Technologies. Its contents may not be relied upon by other parties without the explicit written consent of UES. This is not a statement of suitability of the subject property for any use or purpose. In accepting this report, all parties herein mentioned agree to the conditions of the approved proposal and associated General Conditions between UES and P&O Technologies dated March 10, 2017. A copy of the General Conditions is presented in **Appendix B**.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located at 7914, 7916 and 7918 West Drive in North Bay Village, Miami-Dade County, Florida and identified with the following MDCPAs Folio No. 23-3209-001-0160. The subject property comprises of approximately 0.77 acres in size and is currently vacant land with partially constructed building footings (concrete, excavation pit and steel rebar). Asphalt parking spaces are located along the eastern side of the subject property. The subject property is located within Section 9, Township 53 South, and Range 42 East, as referenced in the USGS topographic quadrangle map titled "Miami, FL" provided in **Appendix A-1**. Please refer to the Site Plan/2016 Aerial Photograph in **Appendix A-2** and the property appraiser records in **Appendix C** for additional details, including the subject property legal description.

2.2 PROPERTY AND VICINITY CHARACTERISTICS

At the time of our evaluation, the subject property was vacant land with partially constructed building footings. Asphalt parking spaces were located on the eastern side of the subject property. The subject property vicinity is characterized primarily by residential properties. Refer to the Site Location Map in **Appendix A-1** and to the 2016 Aerial Photograph/Site Plan in **Appendix A-2** for additional details pertaining to the subject and surrounding properties.

2.3 CURRENT USE OF THE SITE

At the time of the site reconnaissance, the subject property was vacant land with partially constructed building footings. Asphalt parking spaces are located along the eastern portion of the subject property.

Access to the subject property is from West Drive along the eastern boundary. Alternatively, access can be obtained to the subject property by boat from Biscayne Bay to the west.

2.4 STRUCTURES, ROADS, AND/OR OTHER IMPROVEMENTS WITHIN THE SITE

There are no structures, roads or other improvements on the subject property except for the asphalt parking spaces along the east side of the subject property. As mentioned above, the subject property has been partially constructed with building footings.

2.5 CURRENT USES OF ADJOINING PARCELS

Currently, the parcels adjoining the subject property are used as follows:

TABLE 1
Description of Adjoining Parcels

Direction From Subject Property	Description of Current Use
North	Dr. Paul Vogel Community Park addressed as 7920 West Drive.
East	West Drive followed by an apartment building addressed as 7917 West Drive and a parking lot.
South	Harbor West Apartments addressed as 7910 West Drive.
West	Intracoastal Waterway/Biscayne Bay.

Facilities adjoining the subject property do not appear to have the potential to have created RECs in connection with the subject property, based upon the visual site inspection.

3.0 USER PROVIDED INFORMATION

UES furnished a User Questionnaire to Mr. Maurizio Pejoves for the subject property, a designated representative of P&O Technologies and Owner of the subject property.

3.1 TITLE RECORDS

The User did not contract UES to acquire a chain-of-title for the subject property, nor was one provided to UES during this assessment. Chain-of-title records typically contain information regarding historical site ownership. Therefore, UES did not review chain-of-title information during this assessment.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

At the issuance of this report, the User did not supply UES with a completed User Questionnaire.

Information pertaining to potential environmental liens or activity and use limitations on the subject property that are filed or recorded under Federal, Tribal, State or local laws was not supplied by the User. Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

3.3 SPECIALIZED KNOWLEDGE

At the issuance of this report, the User did not supply UES with a completed User Questionnaire.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

At the issuance of this report, the User did not supply UES with a completed User Questionnaire.

3.5 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

According to the Miami-Dade County Property Appraiser records, the current owner of the subject property is P&O Technologies.

3.6 REASON FOR PERFORMING PHASE I ESA

UES was contracted to perform this Phase I ESA in order for the prospective owner to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defense to CERCLA liability.

3.7 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION ABOUT THE PROPERTY

At the issuance of this report, the User did not supply UES with a completed User Questionnaire.

3.8 ADDITIONAL INFORMATION

At the issuance of this report, the User did not supply UES with a completed User Questionnaire.

4.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify recognized environmental conditions in connection with the subject property. Accuracy and completeness of record information varies among information sources, including governmental sources. Record information is often inaccurate or incomplete. Standard sources that are reasonably ascertainable were reviewed by UES for this Phase I ESA.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

As a part of this assessment, we reviewed information sources to obtain existing information pertaining to a release of hazardous substances or petroleum products on or near the subject property. UES obtained a ASTM regulatory database report from Environmental Data Resource (EDR), which is provided in **Appendix D**. UES also reviewed other available standard environmental record sources at the Miami-Dade County Division of Environmental Resources Management (DERM) and Florida Department of Environmental Protection (FDEP), as needed.

Table 2 lists the approximate minimum search distances used during this assessment in review of the regulatory database, as set forth in ASTM E1527-13.

TABLE 2
Minimum Search Distances - ASTM E1527-13

Source	Search Distance
--------	-----------------

Source	Search Distance
Federal NPL Site List (National Priorities List)	1.0 mile
Federal Delisted NPL Site List	0.5 mile
Federal CERCLIS List (Comprehensive Environmental Response Compensation and Liability Act of 1980)	0.5 mile
Federal CERCLIS NFRAP Site List	0.5 mile
Federal RCRA CORRACTS Facilities List (Resource Conservation and Recovery Act)	1.0 mile
Federal RCRA non-CORRACTS TSD Facilities List	0.5 mile
Federal RCRA Generators List	subject property & adjoining parcels
Federal Institutional Control/Engineering Control Registries	subject property only
Federal ERNS List (Emergency Response Notification System)	subject property only
States and Tribal Lists of Hazardous Waste Sites identified for investigation or remediation:	
State- and Tribal-equivalent NPL	1.0 mile
State- and Tribal-equivalent CERCLIS	0.5 mile
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	0.5 mile
State and Tribal Leaking Storage Tanks Lists	0.5 mile
State and Tribal Registered Storage Tank Lists	subject property & adjoining parcels
State and Tribal Institutional Control/Engineering Control Registries	subject property only
State and Tribal Voluntary Cleanup Sites	0.5 mile
State and Tribal Brownfield Sites	0.5 mile

4.1.1 FEDERAL, STATE AND COUNTY RECORDS REVIEW

According to information provided by EDR, the subject property is not listed on the Federal, State or county databases. Based on distance, topographic gradient and/or groundwater flow, the surrounding facilities listed on the EDR report do not represent a REC. A summary of information regarding the facilities of potential concern are listed in **Table 3** below.

TABLE 3

Facility	Approximate Location	Database	Evaluation of Recognized Environmental Conditions
Apartments 7917 West Drive	East adjoining	EDR Historical Auto Station, UST	<p>According to available regulatory records, this facility is listed as a closed non-retail fuel user. Records indicate that the facility formerly maintained two USTs that were removed from the site in 1994. No discharges and/or violations have been reported for this facility. Based on the lack of reported discharges and/or violations, this facility does not constitute a REC at this time.</p> <p>The EDR report listed International Auto Repair at the facility in 2006 and 2007. At the issuance of this report, no additional information was available on the Miami-Dade County Division of Environmental Resources Management's (DERM's) online database or on the Florida Department of Environmental Protections (FDEPs) online database OCULUS. Based on the review of the aerial photographs and information from the MDCPA website, the apartment building was constructed in 1963. Therefore, it appears that a tenant registered a business to the apartment building. Therefore, it is UES' opinion that International Auto Repair does not</p>

Facility	Approximate Location	Database	Evaluation of Recognized Environmental Conditions
			represent a REC at this time.
Harbor West Yacht Club 7910 West Drive	South Adjoining	UST, LUST	According to available regulatory records, this facility is listed as a closed retail station. A Discharge Reporting Form (DRF) was submitted in August 1994 in response to a small amount of free floating product found in the excavation during tank removal activities. Four USTs, three 4,000-gallon and one 550-gallon, were removed from the facility in August 1994. The discharge was granted No Further Action (NFA) status in May 1995. Based on the current satisfactory regulatory status, this facility does not constitute a REC at this time.
Delegate Apartments 7925 West Drive	Approximately 200 feet northeast	UST	Review of a Tank Closure Assessment (TCAR) performed by Hydrologic Associates dated September 2000, the facility maintained one 275-gallon UST which formerly contained diesel fuel oil. During the removal, one monitoring well was installed in the former tank pit area of the UST. Groundwater collected from the well was analyzed for volatile organic aromatics including total xylenes and MTBE, and polycyclic aromatic hydrocarbons. The groundwater analytical report did not list any of the tested parameters above laboratory detection limits. A DERM Letter dated October 23, 2000, states that DERM determine the removal and assessment activities as complete. Based on the above-referenced documents, it is UES' opinion that Delegate Apartments does not represent a REC.
Riverside Laundry 7906 West Drive	Approximately 300 feet south	EDR Historical Cleaners	The EDR report listed Riverside Laundry at the address in 1964. The EDR provided city directories did not list the facility at the address. At the issuance of this report, no additional information was available on EmPower or OCULUS. Based on the apparent short duration of time that the facility appeared to operate at the address, distance to the subject property and the tidal influence of local groundwater, it is UES' opinion that Riverside Laundry does not represent a REC.
Quality Cleaners 7904 West Drive	Approximately 300 feet south	EDR Historical Cleaners	The EDR report listed Quality Cleaners at the facility in 2008. No additional information was available on EmPower or OCULUS. Based on the apparent short duration of time that the facility appeared to operate at the address, distance to the subject property and the tidal influence on local groundwater, it is UES' opinion that Quality Cleaners does not represent a REC.
Nelekonar-1 Apartments 7932 West Drive	Approximately 500 feet north	UST	According to a Metropolitan Dade County Environmental Resources Management Storage Tank Section Inspection Report dated March 5, 1990, the facility maintained a 500-gallon doubled wall UST. The content was not reported. However, according to a FDEP Storage Tank Inspection Report dated July 10, 1992 and May 16, 1992, FDEP was unable to verify the existence of a tank as the facility was overgrown with weeds behind a locked fence. No additional information was available on EmPower or OCULUS. Based on the distance to the subject property, it is UES' opinion that Nelekonar-1 Apartments does not represent a REC.

In addition to reviewing the regulatory database report, UES performed reconnaissance of the subject property vicinity to identify any sites not mapped by EDR due to inadequate or inaccurate address information and to look for unregistered facilities. No petroleum storage facilities or facilities suspected to use or generate hazardous materials were observed in the near vicinity of the subject property during field reconnaissance performed by UES. In addition, no Orphan Sites were listed in the EDR report.

4.2 ADDITIONAL ENVIRONMENTAL RECORDS

The FDEP Ethylene Dibromide (EDB) Application Zone Delineation Map indicates EDB-impacted groundwater has not been identified in the geographical section in which the subject property is located. EDB was formerly used in citrus grove applications as a fumigant against nematodes and is a known carcinogen.

Previous Environmental Reports

UES reviewed a previous Phase I ESA performed by UES dated December 14, 2014. The reports describes the subject property as consisting of three MDCPA parcels. The subject property was 0.77 acre in size and was observed to be vacant but was partially developed. In-ground concrete pillars with rebar stick up from the ground were observed. The Phase I ESA did not identify RECs in connection with the subject property.

Please refer to **Appendix E** for copies of environmental reports and documents that have been summarized in Sections 4.1.1 and 4.2 of this report.

4.3 PHYSICAL SETTING SOURCES

The "Miami, Florida" USGS topographic quadrangle map, Miami-Dade County Soil Survey, and regulatory files available regarding properties of environmental concern in the subject property vicinity were reviewed as sources for obtaining information regarding the physical setting of the subject property and surrounding vicinity.

Based on our site reconnaissance, review of USGS maps, aerial photographs, location of the subject property, and the present environmental related conditions of adjacent and nearby properties, the potential for migration of petroleum product or hazardous waste contamination from off-site sources appears low.

4.3.1 TOPOGRAPHY

The USGS topographic quadrangle map titled "Miami, Florida" was referenced as a source for obtaining information regarding the physical setting of the subject property and surrounding vicinity. The subject property is located at an elevation of approximately 5 feet above sea level. The existing topography is relatively flat. A copy of the USGS Quadrangle Map is provided as **Appendix A-1** (Site Location Map).

4.3.2 SOILS/GEOLOGY

The regional geology of Miami-Dade County is characterized by undifferentiated (Pleistocene to Holocene epochs) sediments (Scott, 1992). Stratigraphically located beneath these sedimentary units, the Hawthorn Group (Miocene epoch) is located. The Hawthorn group is the upper confining unit for the Florida Aquifer System and consists of sandy silt grading into dense green clay with limestone, sandy shell with dolomite, phosphate, limestone, and marl being common in the basal unit (Shine, Padgett, and Barfknecht, 1989). Stratigraphically beneath the Hawthorn unit are (Late Cretaceous to Oligocene epochs) units containing limestone and fossiliferous limestone, dolomite, and anhydrite.

According to the United States Department of Agriculture, Natural Resource Conservation Service (NRCS), Web Soil Survey of the subject property, (issued September 14, 2016), surficial soils of the subject property is classified as follows:

Urban Land: - This map unit is in areas where more than 85 percent of the surface is covered by shopping centers, parking lots, streets, sidewalks, airports, large buildings, houses and other structures. The natural soil cannot be observed. The soils in open areas, mostly lawns, vacant lots, playgrounds and parks, are mainly Udorthents. These soils generally have been altered by land grading and shaped or have been covered with about 18 inches of extremely stony, loamy fill material. Areas of these soils are so small that mapping them separately is impractical.

4.3.3 HYDROGEOLOGY

Florida is mantled nearly everywhere by unconsolidated sands and carbonaceous soils that overlie a thick sequence of carbonate and clastic rocks. Locally, these sands, carbonaceous soils, and the sedimentary rock sequences form the Biscayne Aquifer, which is underlain by the Floridian Aquifer. The Floridan aquifer may reach 2,000 feet in thickness and is the primary source of the public water supply.

The direction of the surficial aquifer flow usually follows the topography of the land and flows toward surface bodies of water; however, local groundwater flow can be influenced by factors including surface water bodies, underground structures, seasonal fluctuations in rainfall, soil and bedrock geology, and nearby production wells. Site-specific groundwater can only be determined by the installation of piezometers. Based on the close proximity of the subject property to the Atlantic Ocean, local groundwater flow will be influenced by tidal fluctuations.

4.3.4 VAPOR MIGRATION

Vapor migration refers to the movement of *hazardous substances* or *petroleum products* vapor in the subsurface. A vapor encroachment condition is defined as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater or both either on or near the subject property.

UES conducted a Tier 1 Vapor Encroachment Screening (VES) for the subject property in accordance with ASTM E 2600-10. The Tier 1 screening process utilizes the information collected as part of this Phase I ESA. The Area of Concern for the purpose of this VES is 1/3 mile (1,760 feet) for COC and 1/10 mile (528 feet) for petroleum hydrocarbon COC. The approximate minimum search distances for Federal, Tribal and State-listed facilities surrounding the subject property are presented in **Table 3**.

Table 3
 Approximate Minimum Search Distance Surrounding the Subject Property (ASTM E2600-15)

Source	COC	Petroleum Hydrocarbon COC
Federal NPL Site List	1/3 mile	1/10 mile
Federal CERCLIS List	1/3 mile	1/10 mile
Federal RCRA CORRACTS Facilities List	1/3 mile	1/10 mile
Federal RCRA Non-CORRACTS TSD Facilities List	1/3 mile	1/10 mile
Federal RCRA Generators List	Subject property only	Subject property only
Federal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
Federal ERNS List	Subject property only	Subject property only
State and Tribal Equivalent NPL	1/3 mile	1/10 mile
State and Tribal Equivalent CERCLIS	1/3 mile	1/10 mile
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	1/3 mile	1/10 mile
State and Tribal Leaking UST/AST Lists	1/3 mile	1/10 mile
State and Tribal UST/AST Lists	Subject property only	Subject property only
State and Tribal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
State and Tribal Voluntary Cleanup Sites	1/3 mile	1/10 mile
State and Tribal Brownfield Sites	1/3 mile	1/10 mile

Based on our regulatory records review detailed in Section 5.0, no facilities with documented contamination are located within the Area of Concern; and therefore, no potential vapor encroachment conditions were identified.

4.4 HISTORICAL USE INFORMATION ON THE PROPERTY AND SURROUNDING AREA

UES reviewed aerial photographs, Sanborn Fire Insurance Maps, EDR provided city directories and property records to determine the historical use of the subject property. The subject property appeared be developed with at least one apartment building in least 1949 (7918 West Drive). By 1951, an additional apartment building occupied the subject property (7914 West Drive). Sometime prior to 1958, a third apartment building was constructed on the subject property addressed as 7916 West Drive. The subject property remained developed with three apartment buildings until sometime prior to 2007, when the apartment buildings were razed. The subject property is currently vacant land with partially constructed building footings.

4.4.1 AERIAL PHOTOGRAPH REVIEW

In order to evaluate the previous land uses of the subject property and surrounding area, a series of aerial photographs were reviewed. The aerial photographs provide a progressive overview of the subject property and adjoining properties between 1951 and 2016. UES reviewed aerial photographs available from the Florida Department of Transportation (FDOT) A Plus Website and Google Earth. The Site Plan/2016 Aerial Photograph is available for review in **Appendix A-2**. Descriptions of UES observations are outlined in **Table 4**. Copies of the aerial photographs reviewed are presented in **Appendix F**.

TABLE 4
Summary of Aerial Photographs Observations

Photograph Date	Photograph Quality	Remarks
1951	Good	The subject property is developed with two apparent apartment buildings. Undeveloped land adjoins the subject property to the north and south. The Atlantic Ocean adjoins the subject property to the west, and West Drive followed by undeveloped land adjoins the subject property to the east.
1968	Good	An additional apparent apartment building has been developed on the subject property located in between the previously depicted buildings. Two apartment buildings and a swimming pool have been developed on the north adjoining property. An apartment building and parking lot has been developed on the west adjoining properties. A large reverse C-shaped building has been developed on the south adjoining property.
1973, 1978, 1985, 1991, 1995, 1999, 2002	Fair-Good	No significant changes
2007	Good	The three apparent apartment buildings have been razed from the subject property and north adjoining property. The subject property and north adjoining property are depicted as vacant lands.
2011	Good	No significant changes.
2016	Good	Concrete pads for foundations and pillars are observed on the subject property which appears to be in the early stages of redevelopment. A park has been constructed on the north adjoining property.

4.4.2 PROPERTY OWNERSHIP RECORDS

According to the Miami-Dade County Property Appraiser reports, the current owner of the subject property is P&O Technologies, Inc.

The User did not contract UES to acquire a chain-of-title report for the subject property, which typically contains information regarding historical site ownership.

UES reviewed the Miami-Dade County Wellfield Protection Areas Map to determine if the subject property is located within a wellfield. The subject property is not located within a wellfield protection area.

4.4.3 FIRE INSURANCE MAP REVIEW

EDR conducted a review of the largest and most complete collection of Sanborn® fire insurance maps based on information pertaining to the subject property location provided by UES. EDR provided Sanborn® fire insurance maps for 1951, 1960, 1965, 1968 and 1972. Descriptions of UES' observations are outlined in **Table 5**.

TABLE 5
 Summary of Fire Insurance Map Observations

Map Date	Map Quality	Remarks
1951	Good	Two apartment buildings addressed as 7914 and 7918 West Drive are depicted on the subject property. Undeveloped land adjoins the subject property to the north and south. West Drive followed by undeveloped land adjoins the subject property to the east. The Biscayne Bay/Atlantic Ocean adjoins the subject property to the west.
1960	Good	An additional building has been developed on the subject property (7916 West Drive). Apartment buildings addressed as 7920 and 7922 West Drive have been developed on the north adjoining property. A large reverse C-Shaped apartment building addressed as 7910 West Drive.
1965	Good	An apartment building has been developed on the east adjoining property addressed as 7917 West Drive.
1972	Good	No significant changes.

4.4.4 CITY DIRECTORY REVIEW

UES reviewed EDR provided city directories for the subject property and vicinity. Historical city directories dated from 1923 through to 2014 were reviewed in approximate five year intervals. No listings for the subject property were found in the EDR provided city directories prior to 1949. Listings identified at the subject property and adjoining properties can be found in **Table 6 below**. Listings of potential concern are **bolded**.

Table 6
 EDR Provided City Directories

Location	Address and listings
Subject Property	<u>7914 West Drive</u> 1923-1961: No listing 1962-2001: Residential 2005-2014: No listing
	<u>7916 West Drive</u> 1923-1956: No listing 1958-2001: Residential 2005-2014: No listing
	<u>7918 West Drive</u> 1923-1946: No listing 1949-2001: Residential 2005-2014: No listing
North	<u>7920 West Drive</u> 1923-1956: No listing 1958-2005: Residential
	<u>7922 West Drive</u> 1923-1965: No listing 1970-1981: Residential 1985-2014: No listing
East	<u>7917 West Drive</u> 1923-1962: No listing 1964-2005: Residential 2010: Cowboys Lounge, Inc. 2015: Shungo Corporation, Inc.
South	<u>7910 West Drive</u>

Location	Address and listings
	1923-1956: No listing 1958-1961: Sea Gull Docks 1962-1965: Harbor Yacht Club Apartments 1970-1973: Colony Yacht Club Apartments 1975-1991: Harbor West Apartments and Yacht Club 2001-2014: Residential
West	No address; Biscayne Bay.

4.4.5 LAND USE RECORDS

According to the Miami-Dade County Existing Land Use Map, the subject property is currently zoned in Vacant Privately Owned, Unprotected.

UES reviewed the Miami-Dade County Wellfield Protection Areas Map to determine if the subject property is located within a wellfield. The subject property is not located within a wellfield protection area.

4.4.6 OTHER HISTORICAL SOURCES

No other historical sources were reviewed in preparation of this Phase I ESA.

5.0 INFORMATION FROM SITE RECONNAISSANCE

On March 15, 2017, a site reconnaissance of the subject property was completed by Mr. Leigh Marshallsay of UES. The purpose was to evaluate the current conditions of the subject property and to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the subject property. Mr. Marshallsay was unescorted during the site reconnaissance.

5.1 METHODOLOGY

The reconnaissance included walking the accessible portions of the subject property and the site perimeter. This visual observation of the subject property focused primarily on its surface features. Property use and significant features are indicated on the 2016 Aerial Photograph/Site Plan contained in **Appendix A-2**. Representative site photographs are included in **Appendix I**.

5.2 GENERAL SITE SETTING

The general site setting is characterized by primarily by residential development. The subject property was a vacant parcel with pieces of poured concrete and steel rebar pieces sticking out of the ground in various places. Asphalt parking spaces are located along the east side of the subject property.

5.3 SITE OBSERVATIONS

Site features observed, encountered, or suspected during our site visit are summarized in **Table 7** and discussed in the following sections.

Table 7
Site Reconnaissance Summary

Report Section	Section Information/Detail	Observed or Encountered		
		Yes	No	Suspect
5.3.1	Limiting Conditions		✓	
5.3.2	Floor Drains		✓	
5.3.3	Buildings		✓	
5.3.4	Heating And Cooling Sources		✓	
5.3.5	Drinking Water Source		✓	
5.3.6	Wastewater Discharge Source		✓	
5.3.7	Current Tenant Operations		✓	
5.3.8	Past Tenant Operations		✓	
5.3.9	Polychlorinated Biphenyls	✓		
5.3.10	Hazardous Substances and Petroleum Products		✓	
5.3.11	Storage Tanks		✓	
5.3.12	Odors		✓	
5.3.13	Pools Of Liquids		✓	
5.3.14	Drums And Containers		✓	
5.3.15	Unidentified Substance Containers		✓	
5.3.16	Stains Or Corrosion On Floors, Walls Or Ceilings		✓	
5.3.17	Sumps		✓	
5.3.18	Pits, Ponds Or Lagoons		✓	
5.3.19	Stained Soil Or Pavement		✓	
5.3.20	Stressed Vegetation		✓	
5.3.21	Wells		✓	
5.3.22	Adjacent and Nearby Properties	✓		
5.3.23	Solid Waste, Construction Debris and/or Imported Soil Stockpile	✓		
5.2.24	Additional Notable Site Features		✓	

5.3.1 LIMITING CONDITIONS

Limiting conditions were not encountered during the site reconnaissance.

5.3.2 FLOOR DRAINS

The subject property was not developed with structures.

5.3.3 BUILDINGS

The subject property was not developed with structures.

5.3.4 HEATING AND COOLING SOURCES

The subject property was not developed with structures.

5.3.5 DRINKING WATER SOURCE

The subject property was not developed with structures. However, according to Mr. Mario Portuondo, Engineer at the Miami-Dade County Water and Sewer (WASD), North Bay Village Department of Public Work provides drinking water to the area.

5.3.6 WASTEWATER DISCHARGE SOURCE

The subject property was not developed with any structures. North Bay Village Department of Public Works provides sewer services to the area.

5.3.7 CURRENT TENANT OPERATIONS

The subject property is not developed with structures.

5.3.8 PAST TENANT OPERATIONS

The subject property was previously developed with three apartment buildings addressed as 7914, 7916 and 7918 West Drive.

5.3.9 POLYCHLORINATED BIPHENYLS

UES observed one pole-mounted transformer along the east side of the subject property. UES did not observe staining on the ground beneath the pole-mounted transformer or on the concrete pole housing the transformer that was indicative of a release.

5.3.10 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

UES observed the following chemicals at the subject property:

- Twelve bags of concrete observed on the west side of the subject property;
- Five, 1-quart bottles of motor oil which were empty were observed in the central portion of the subject property within the excavation area;
- Two, 5-gallon containers of a paint which were empty were observed in the excavation area.

No evidence of releases or discharges to the subsurface was identified in connection with the observed chemicals.

5.3.11 STORAGE TANKS

No storage tanks (UST or AST) were observed by UES during the site reconnaissance.

5.3.12 ODORS

No unusual odors were noted by UES during the site reconnaissance.

5.3.13 POOLS OF LIQUIDS

No pools of liquid were observed by UES during the site reconnaissance.

5.3.14 DRUMS AND CONTAINERS

Please see section 5.3.10.

5.3.15 UNIDENTIFIED SUBSTANCE CONTAINERS

No unidentified substance containers were observed by UES during the site reconnaissance.

5.3.16 STAINS OR CORROSION ON FLOORS, WALLS OR CEILINGS

The subject property was not developed with structures.

5.3.17 SUMPS

UES did not observe the presence of any sumps at the subject property during the site reconnaissance.

5.3.18 PITS, PONDS OR LAGOONS

UES did not observe pits, ponds or lagoons during the site reconnaissance.

5.3.19 STAINED SOIL OR PAVEMENT

UES observed oil staining on the asphalt parking lot on the east side of the subject property. The staining appears to be from vehicular oil from the parking lot users. The asphalt looked to be in good condition and therefore, the staining represents a *de minimis* condition.

5.3.20 STRESSED VEGETATION

UES did not observe stressed vegetation at the subject property during the site reconnaissance.

5.3.21 WELLS

UES did not observe wells on the subject property.

5.3.22 ADJACENT AND NEARBY PROPERTIES

UES observed apartment buildings to the east and south, Dr. Paul Vogel Community Park to the North and the Biscayne Bay/Atlantic Ocean to the west.

5.3.23 SOLID WASTE, CONSTRUCTION DEBRIS AND/OR IMPORTED SOIL STOCKPILES

UES observed old construction debris throughout the subject property. Although the subject property is vacant land, an excavation pit was observed in the center of the subject property and fragments of

concrete foundations with rebar sticking out of the ground were observed. In addition, debris including wooden and metal scrap, empty paint and motor oil containers were observed within the central excavation pit. According Mr. Maurizio Pejoves, he purchased the subject property in 2015. He stated that the former owner begin developing the subject property for construction of a new building but due to financial constrains, construction ceased. Based on the surficial observations of hazardous materials, additional hazardous materials may also be present within the excavation area that are inaccessible or unobservable to UES. Therefore, it is UES' opinion that the dumped material represents a REC.

5.3.24 ADDITIONAL NOTABLE SITE FEATURES

No additional notable site features were identified during this assessment.

6.0 INTERVIEWS

6.1 INTERVIEW WITH OWNER

UES interviewed Mr. Maurizio Pejoves, Owner of the subject property on March 20, 2017. He stated that he purchased the subject property in 2015. Mr. Pejoves stated that the previous owner began to redevelop the subject property but due to financial constrains, could not complete the construction of the new building. The fragments of poured concrete, the excavation pit in the center of the subject property and steel rebar sticking out of the ground that are present today are from the previous owner. Mr. Pejoves added that he is not aware that the subject property was developed with three apartment buildings in the past. He is not aware of any USTs, ASTs or any other storage or use of petroleum products or hazardous materials at the subject property. He is not aware of any environmental cleanups that have taken place at the subject property. He is not aware of any environmental liens or activity and use limitations on the subject property that are filed or recorded under Federal, Tribal, State or local laws. He is not aware of any contamination present at the subject property. Interview documentation is included in **Appendix J**.

UES was unable to locate or interview any previous owners of the subject property. It is UES' opinion that this data failure does not appear to be a significant one that would warrant further investigation.

6.2 INTERVIEW WITH SITE MANAGER

Mr. Pejoves with P&O Technologies is the property owner. Please refer to Section 6.1 for interview information.

6.3 INTERVIEWS WITH OCCUPANTS

At the time of this assessment, the subject was not developed with completed structures.

6.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

UES contacted the Miami-Dade County Fire Rescue Department (MDCFRD) at mdfrd@miamidade.gov, regarding environmental records for the subject property. At the issuance of this report, a response from the MDCFRD was not received.

UES contacted the Florida Department of Health (FDOH) at health@doh.state.fl.us regarding environmental records for the subject property. At the issuance of this report, a response from the FDOH was not received.

UES contacted Mr. Mario Portuondo, Engineer at the Miami-Dade County WASD regarding the date of municipal sewer connection in the vicinity of the subject property. Mr. Portuondo stated that the subject property and surrounding area is not serviced by Miami-Dade County WASD and is serviced by The City of North Bay Village Public Utilities Department (NBVPUD).

UES contacted the NBVPUD at (305) 756-7722 regarding the date of municipal sewer connection in the vicinity of the subject property. At the issuance of this report, a response from the NBVPUD had not been received.

6.5 INTERVIEW WITH USER

UES furnished a User Questionnaire to Mr. Maurizio Pejoves. At the issuance of this report, a completed User Questionnaire was not received; however, UES was able perform an interview with the owner and user, Mr. Pejoves on March 20, 2017. Refer to Section 6.1 for interview information. Interview documentation is included in **Appendix J**.

6.6 INTERVIEW WITH OTHERS

No other interviews were conducted in preparation of this Phase I ESA.

7.0 FINDINGS AND OPINIONS

Based on UES' field observations, historical research, public records review and interviews conducted in accordance with ASTM format E1527-13, the findings and opinions of this Phase I ESA are as follows:

1. UES reviewed aerial photographs, Sanborn Fire Insurance Maps, EDR provided city directories and property records to determine the historical use of the subject property. The subject property appeared be developed with at least one apartment building in 1949 (7918 West Drive). By 1951, an additional apartment building occupied the subject property (7914 West Drive). Sometime prior to 1958, a third apartment building was constructed on the subject property addressed as 7916 West Drive. The subject property remained developed with three apartment buildings until sometime prior to 2007, when the apartment buildings were razed. The subject property is currently vacant land with partially constructed building footings.
2. During site reconnaissance, UES observed dumped material in the onsite excavation pit. The dumped material included paint cans and motor oil. Based on the surficial observations of hazardous materials, additional hazardous materials may also be present within the excavation area that are inaccessible or unobservable to UES. Therefore, it is UES' opinion that the dumped material represents a REC.

3. UES observed oil staining on the asphalt parking lot on the east side of the subject property. The staining appears to be from vehicular oil from the parking lot users. The asphalt was observed to be in good condition and therefore, the staining represents a *de minimis* condition.

8.0 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at 7914, 7916 and 7918 West Drive, North Bay Village, Miami-Dade County, Florida and identified with the following MDCPA Folio Number 23-3209-001-0160. Any exceptions to or deletions from this practice are described in Sections 1.2, 1.3, and 1.4 of this report.

This assessment has revealed evidence of a REC in connection with the subject property. Based on the identification of a REC, it is UES' opinion that further assessment is warranted at this time.

The User of this report is required to ensure that continuing obligations are followed after purchase or acquisition of the subject property. Any land use restrictions in effect at the subject property must be maintained. The User should ensure that all parties at the subject property are following best management practices and taking "reasonable steps" with respect to preventing and limiting exposure to any hazardous substance releases on the subject property. In the event of a future release on the subject property, the property owner or responsible party should report it to the appropriate regulatory agency. Full cooperation must be provided to any parties authorized to conduct assessments or responses to the site.

Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

9.0 DEVIATIONS

UES prepared this Phase I ESA in compliance with ASTM E1527-13.

10.0 ADDITIONAL SERVICES

Under the terms of the agreement between UES and P&O Technologies, no other services beyond the Phase I ESA were performed as part of this assessment.

11.0 REFERENCES

References reviewed during the Phase I ESA are documented in **Appendix K**.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Please refer to the title page for signatures of the environmental professionals who prepared and reviewed this Phase I ESA.

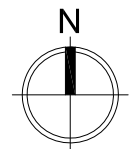

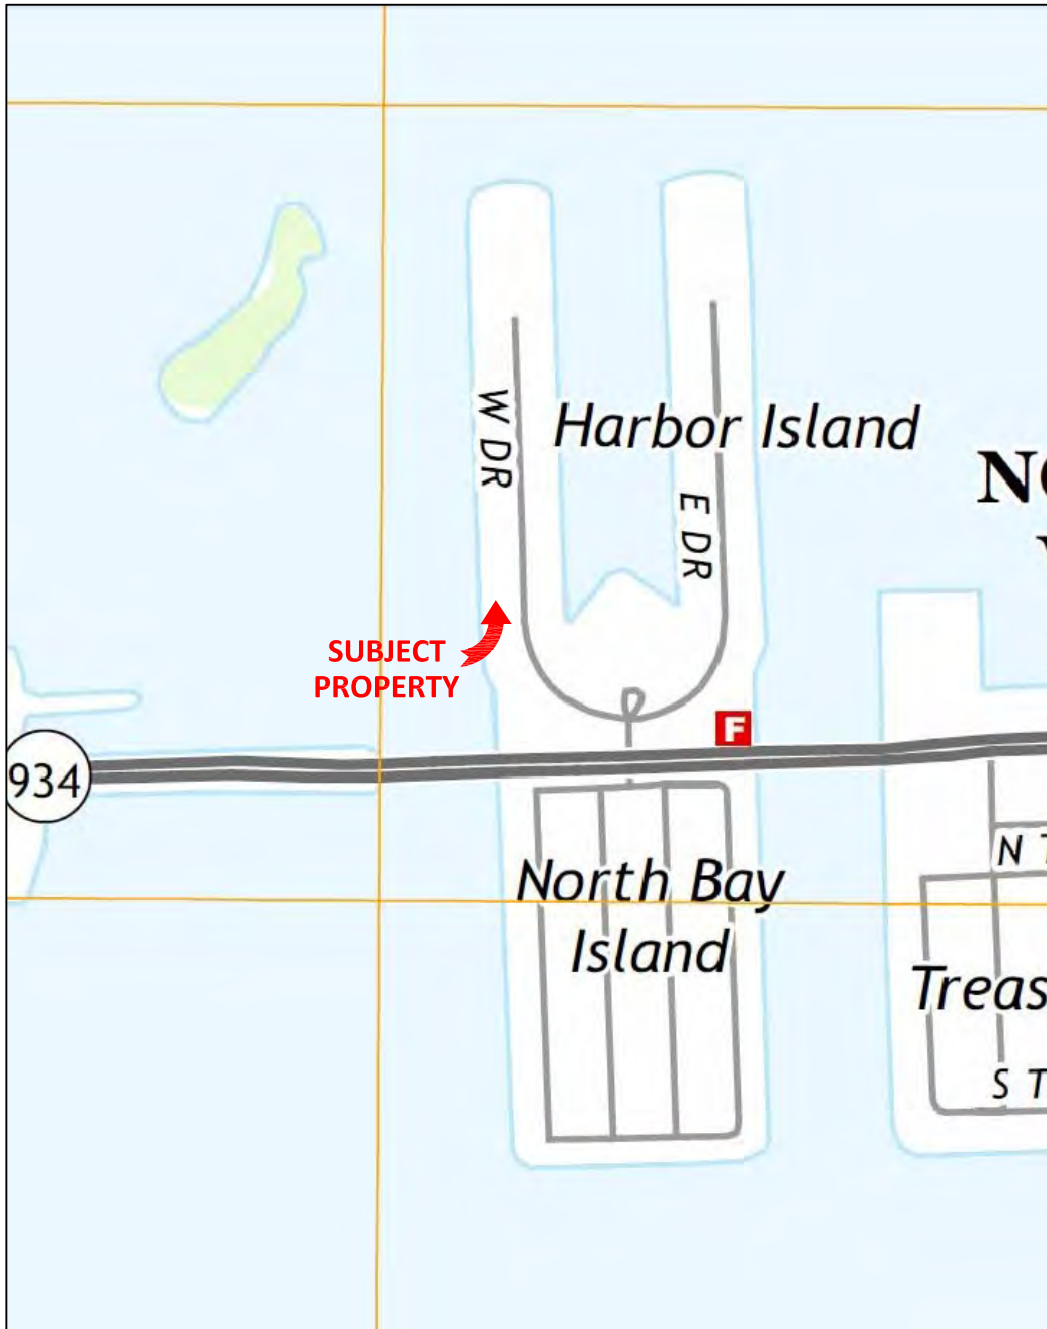

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

This assessment was completed by Mr. Leigh Marshallsay, Project Manager, and reviewed by Mr. Paul Saneaux, Environmental Scientist, both employees of Universal Engineering Sciences, Inc. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Qualifications of personnel participating in this assessment are provided in **Appendix L**.

APPENDIX B

UNIVERSAL
ENGINEERING SCIENCES

Universal Engineering Sciences, Inc.
GENERAL CONDITIONS

SECTION 1: RESPONSIBILITIES

- 1.1 *Universal Engineering Sciences, Inc.*, ("UES"), has the responsibility for providing the services described under the Scope of Services section. The work is to be performed according to accepted standards of care and is to be completed in a timely manner. The term "UES" as used herein includes all of *Universal Engineering Sciences, Inc.*'s agents, employees, professional staff, and subcontractors.
- 1.2 The Client or a duly authorized representative is responsible for providing UES with a clear understanding of the project nature and scope. The Client shall supply UES with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow UES to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.
- 1.3 The Client acknowledges that UES's responsibilities in providing the services described under the Scope of Services section is limited to those services described therein, and the Client hereby assumes any collateral or affiliated duties necessitated by or for those services. Such duties may include, but are not limited to, reporting requirements imposed by any third party such as federal, state, or local entities, the provision of any required notices to any third party, or the securing of necessary permits or permissions from any third parties required for UES's provision of the services so described, unless otherwise agreed upon by both parties.
- 1.4 Universal will not be responsible for scheduling our services and will not be responsible for tests or inspections that are not performed due to a failure to schedule our services on the project or any resulting damages.
- 1.5 **PURSUANT TO FLORIDA STATUTES §558.0035, ANY INDIVIDUAL EMPLOYEE OR AGENT OF UES MAY NOT BE HELD INDIVIDUALLY LIABLE FOR NEGLIGENCE.**

SECTION 2: STANDARD OF CARE

- 2.1 Services performed by UES under this Agreement will be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of UES's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, express or implied, is made.
- 2.2 The Client recognizes that subsurface conditions may vary from those observed at locations where borings, surveys, or other explorations are made, and that site conditions may change with time. Data, interpretations, and recommendations by UES will be based solely on information available to UES at the time of service. UES is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed.
- 2.3 Execution of this document by UES is not a representation that UES has visited the site, become generally familiar with local conditions under which the services are to be performed, or correlated personal observations with the requirements of the Scope of Services. It is the Client's responsibility to provide UES with all information necessary for UES to provide the services described under the Scope of Services, and the Client assumes all liability for information not provided to UES that may affect the quality or sufficiency of the services so described.
- 2.4 Should UES be retained to provide threshold inspection services under Florida Statutes §553.79, Client acknowledges that UES's services thereunder do not constitute a guarantee that the construction in question has been properly designed or constructed, and UES's services do not replace any of the obligations or liabilities associated with any architect, contractor, or structural engineer. Therefore it is explicitly agreed that the Client will not hold UES responsible for the proper performance of service by any architect, contractor, structural engineer or any other entity associated with the project.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

- 3.1 Client will grant or obtain free access to the site for all equipment and personnel necessary for UES to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted UES free access to the site. UES will take reasonable precautions to minimize damage to the site, but it is understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.
- 3.2 The Client is responsible for the accuracy of locations for all subterranean structures and utilities. UES will take reasonable precautions to avoid known subterranean structures, and the Client waives any claim against UES, and agrees to defend, indemnify, and hold UES harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, Client agrees to compensate UES for any time spent or expenses incurred by UES in defense of any such claim with compensation to be based upon UES's prevailing fee schedule and expense reimbursement policy.

SECTION 4: SAMPLE OWNERSHIP AND DISPOSAL

- 4.1 Soil or water samples obtained from the project during performance of the work shall remain the property of the Client.
- 4.2 UES will dispose of or return to Client all remaining soils and rock samples 60 days after submission of report covering those samples. Further storage or transfer of samples can be made at Client's expense upon Client's prior written request.
- 4.3 Samples which are contaminated by petroleum products or other chemical waste will be returned to Client for treatment or disposal, consistent with all appropriate federal, state, or local regulations.

SECTION 5: BILLING AND PAYMENT

- 5.1 UES will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classifications.
- 5.2 Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one and one-half percent (1 ½ %) per month, or the maximum rate allowed by law, on past due accounts.
- 5.3 If UES incurs any expenses to collect overdue billings on invoices, the sums paid by UES for reasonable attorneys' fees, court costs, UES's time, UES's expenses, and interest will be due and owing by the Client.

SECTION 6: OWNERSHIP AND USE OF DOCUMENTS

- 6.1 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, as instruments of service, shall remain the property of UES.
- 6.2 Client agrees that all reports and other work furnished to the Client or his agents, which are not paid for, will be returned upon demand and will not be used by the Client for any purpose.
- 6.3 UES will retain all pertinent records relating to the services performed for a period of five years following submission of the report, during which period the records will be made available to the Client at all reasonable times.
- 6.4 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, are prepared for the sole and exclusive use of Client, and may not be given to any other party or used or relied upon by any such party without the express written consent of UES.

SECTION 7: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

- 7.1 Client warrants that a reasonable effort has been made to inform UES of known or suspected hazardous materials on or near the project site.
- 7.2 Under this agreement, the term hazardous materials include hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls, and asbestos.
- 7.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. UES and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition mandating a renegotiation of the scope of work. UES and Client also agree that the discovery of unanticipated hazardous materials may make it necessary for UES to take immediate measures to protect health and safety. Client agrees to compensate UES for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous waste.
- 7.4 UES agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold UES harmless for any and all consequences of disclosures made by UES which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials.
- 7.5 Notwithstanding any other provision of the Agreement, Client waives any claim against UES, and to the maximum extent permitted by law, agrees to defend, indemnify, and save UES harmless from any claim, liability, and/or defense costs for injury or loss arising from UES's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by UES which are found to be contaminated.

SECTION 8: RISK ALLOCATION

- 8.1 Client agrees that UES's liability for any damage on account of any breach of contract, error, omission or other professional negligence will be limited to a sum not to exceed \$50,000 or UES's fee, whichever is greater. If Client prefers to have higher limits on contractual or professional liability, UES agrees to increase the limits up to a maximum of \$1,000,000.00 upon Client's written request at the time of accepting our proposal provided that Client agrees to pay an additional consideration of four percent of the total fee, or \$400.00, whichever is greater. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance.

SECTION 9: INSURANCE

- 9.1 UES represents and warrants that it and its agents, staff and consultants employed by it, is and are protected by worker's compensation insurance and that UES has such coverage under public liability and property damage insurance policies which UES deems to be adequate. Certificates for all such policies of insurance shall be provided to Client upon request in writing. Within the limits and conditions of such insurance, UES agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by UES, its agents, staff, and consultants employed by it. UES shall not be responsible for any loss, damage or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 8, whichever is less. The Client agrees to defend, indemnify and save UES harmless for loss, damage or liability arising from acts by Client, Client's agent, staff, and other UESs employed by Client.

SECTION 10: DISPUTE RESOLUTION

- 10.1 All claims, disputes, and other matters in controversy between UES and Client arising out of or in any way related to this Agreement will be submitted to alternative dispute resolution (ADR) such as mediation or arbitration, before and as a condition precedent to other remedies provided by law, including the commencement of litigation.
- 10.2 If a dispute arises related to the services provided under this Agreement and that dispute requires litigation instead of ADR as provided above, then:
- the claim will be brought and tried in judicial jurisdiction of the court of the county where UES's principal place of business is located and Client waives the right to remove the action to any other county or judicial jurisdiction, and
 - The prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorneys' fees, and other claim related expenses.

SECTION 11: TERMINATION

- 11.1 This agreement may be terminated by either party upon seven (7) days written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof. Such termination shall not be effective if that substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, UES shall be paid for services performed to the termination notice date plus reasonable termination expenses.
- 11.2 In the event of termination, or suspension for more than three (3) months, prior to completion of all reports contemplated by the Agreement, UES may complete such analyses and records as are necessary to complete its files and may also complete a report on the services performed to the date of notice of termination or suspension. The expense of termination or suspension shall include all direct costs of UES in completing such analyses, records and reports.

SECTION 12: ASSIGNS

- 12.1 Neither the Client nor UES may delegate, assign, sublet or transfer their duties or interest in this Agreement without the written consent of the other party.

SECTION 13. GOVERNING LAW AND SURVIVAL

- 13.1 The laws of the State of Florida will govern the validity of these Terms, their interpretation and performance.
- 13.2 If any of the provisions contained in this Agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provisions will not be impaired. Limitations of liability and indemnities will survive termination of this Agreement for any cause.

SECTION 14. INTEGRATION CLAUSE

- 14.1 This Agreement represents and contains the entire and only agreement and understanding among the parties with respect to the subject matter of this Agreement, and supersedes any and all prior and contemporaneous oral and written agreements, understandings, representations, inducements, promises, warranties, and conditions among the parties. No agreement, understanding, representation, inducement, promise, warranty, or condition of any kind with respect to the subject matter of this Agreement shall be relied upon by the parties unless expressly incorporated herein.
- 14.2 This Agreement may not be amended or modified except by an agreement in writing signed by the party against whom the enforcement of any modification or amendment is sought.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

EXECUTIVE SUMMARY

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 10/06/2016 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 13 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

TANKS: This listing includes storage tank facilities that do not have tank information. The tanks have either be closed or removed from the site, but the facilities were still registered at some point in history.

A review of the TANKS list, as provided by EDR, and dated 10/06/2016 has revealed that there is 1 TANKS site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MC AND DD CORP	7928 WEST DR #606	N 0 - 1/8 (0.060 mi.)	C5	11

Miami-Dade Co. HWS: Hazardous Waste Agency. Sites with potential to generate waste. The list comes from the Miami-Dade County Department of Environmental Resources Management.

A review of the Miami-Dade Co. HWS list, as provided by EDR, and dated 11/29/2016 has revealed that there is 1 Miami-Dade Co. HWS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DANNY'S SERVICE STAT Facility ID: 2112	1345 NE 79 ST	SE 1/8 - 1/4 (0.162 mi.)	D11	14

Miami-Dade IW: Miami-Dade County Industrial Waste list comes from the Department of Environmental Resources Management.

A review of the Miami-Dade IW list, as provided by EDR, has revealed that there are 2 Miami-Dade IW sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MAGIC GROOMING, INC. Database: Miami-Dade Co. IW5, Date of Government Version: 11/29/2016	7904 WEST DR SUITE 2	SSE 0 - 1/8 (0.070 mi.)	B7	13

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A

Number of Days to Update: 29	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (404) 562-8651
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (404) 562-8651
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (404) 562-8651

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State and tribal Brownfields sites

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Marine Facilities Operating Permit

What is this permit used for? Miami-Dade County Ordinance 89-104 and Section 24-18 of the Code of Miami-Dade County require the following types of marine facilities to obtain annual operating permits from DERM: All recreational boat docking facilities with ten (10) or more boat slips, moorings, davit spaces, and vessel tie-up spaces. All boat storage facilities contiguous to tidal waters in Miami-Dade County with ten (10) or more dry storage spaces including boatyards and boat manufacturing facilities.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

PROPOSED NORTH BAY VILLAGE RESIDENTIAL BUILDING
7914 WEST DRIVE
MIAMI BEACH, FL 33141

TARGET PROPERTY COORDINATES

Latitude (North):	25.850582 - 25° 51' 2.10"
Longitude (West):	80.160239 - 80° 9' 36.86"
Universal Transverse Mercator:	Zone 17
UTM X (Meters):	584150.8
UTM Y (Meters):	2859244.0
Elevation:	1 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5655644 MIAMI, FL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

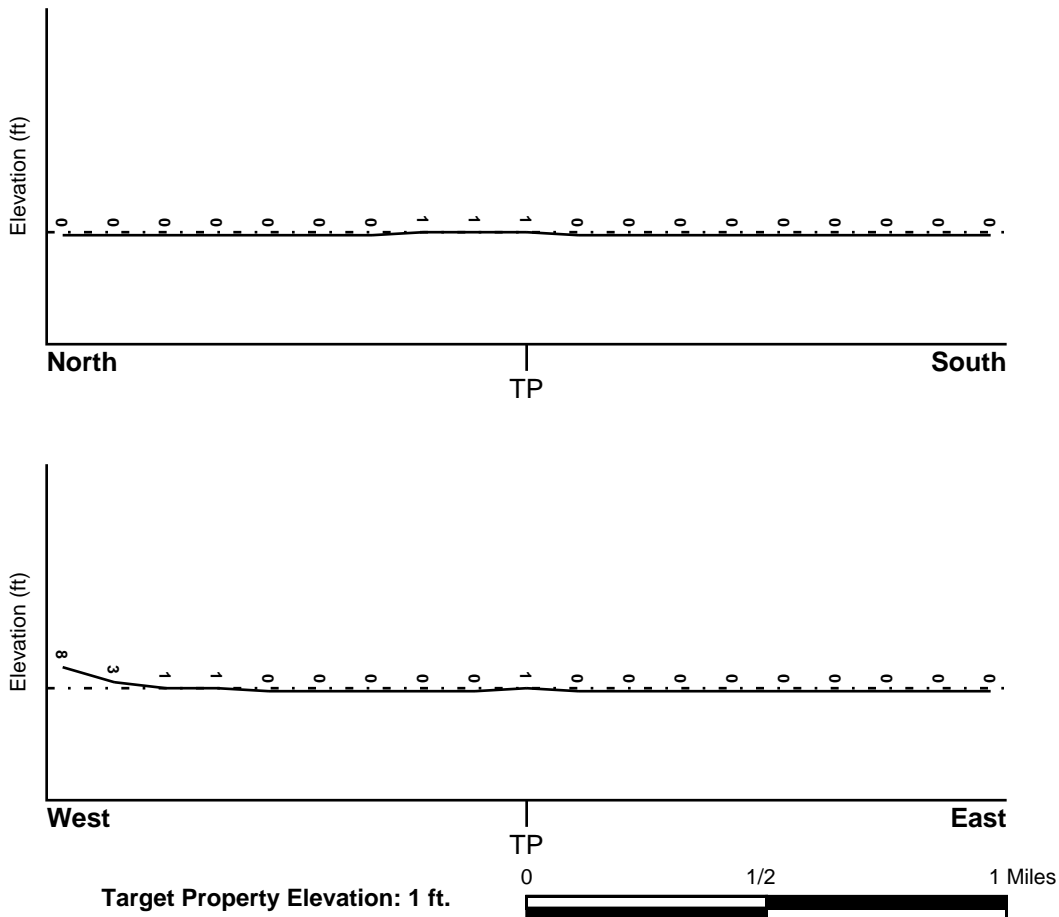

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
12086C0306L	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

12086C0309L	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
MIAMI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/4 - 1/2 Mile ESE	N

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: water

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	0 inches	water	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: water

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Re: Tank Closure Report (TCR) dated September 2000 and prepared by Hydrologic Associates U.S.A., Inc., for the Delagate Apartments (UT-4481/11940), located at, near, or in the vicinity of 7925 West Drive, North Bay Village, Miami-Dade County, Florida.

Dear Mr. Leyva:

The Department of Environmental Resources Management (DERM) has reviewed the above referenced document received September 22, 2000 pertaining to the removal of one 275 gallon heating oil underground storage tank on August 4, 2000 and has determined that it is complete.

Be advised that the soil and groundwater sample analyses reported for this site do not exceed the contaminant levels referenced in Chapter 62-777, Florida Administrative Code (FAC). Based on the above, a "discovery" pursuant to Chapter 62-770, Florida Administrative Code (F.A.C.) has not been documented at the site.

If subsequent evidence indicates that a discharge of petroleum or petroleum products has occurred, then further action will be required to define the nature and extent of the contamination.

If you have any questions concerning this matter, please contact Vesna D. Clark of the Pollution Remediation Section at (305) 372-6700.

Sincerely,

Wilbur Mayorga, P.E., Chief
Pollution Remediation Section

SPLIT SAMPLE

INSPECTION REPORT

DATE: 8/29/00

TIME: 1:00 P.M.

I arrived at the above referenced site for a split sampling inspection. I met on site with Mr. Scott Liddell of Hydrologic Associates, Inc.

Mr. Liddell measured the dimensions of the water column in the monitoring well to be sampled and purged approximately 10 gallons using a bailer.

Sample was obtained from a monitoring well installed in the center of the excavation for the UST removed on 8/4/00.

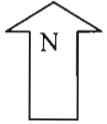

The dimensions of the monitoring well were:

DIAMETER OF WELL	DEPTH TO WATER	DEPTH TO BOTTOM	GALLONS PURGED
2"	6.34'	15.0'	10 GALLONS

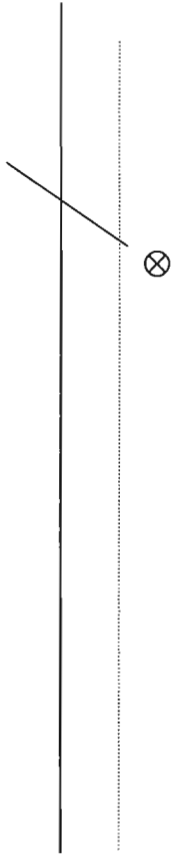

Sample was obtained per QAP procedures:

SAMPLE OBTAINED	BLUE CARD NUMBER	TIME SAMPLE OBTAINED

DESCRIPTION OF INSPECTION:

TANK CLOSURE INSPECTION

INSPECTION REPORT

DATE: 8/4/00

TIME: 1:43 P.M.

I arrived at the above referenced facility to conduct a tank closure inspection. I met on site with Mr. Ron Bagwell of Bagwell Equipment Co.

The following information was documented:

UST REMOVED: 1 - 275 gallon steel UST used to store heating oil was properly removed. The UST was very corroded and many holes were observed around the surface of the tank.

PRODUCT PIPING: copper product piping would be capped and steel vent piping and riser would be removed according to Mr. Bagwell.

SLUDGE AND PRODUCT REMOVED: Cliff Berry Inc. pumped out 150 gallons of product/washwater from the UST.

EXCAVATION: the dimensions were approximately 4' x 7' x 4' deep. Soil and walls appeared to be contaminated. **Groundwater was not reached.** Clean backfill was not observed on site.

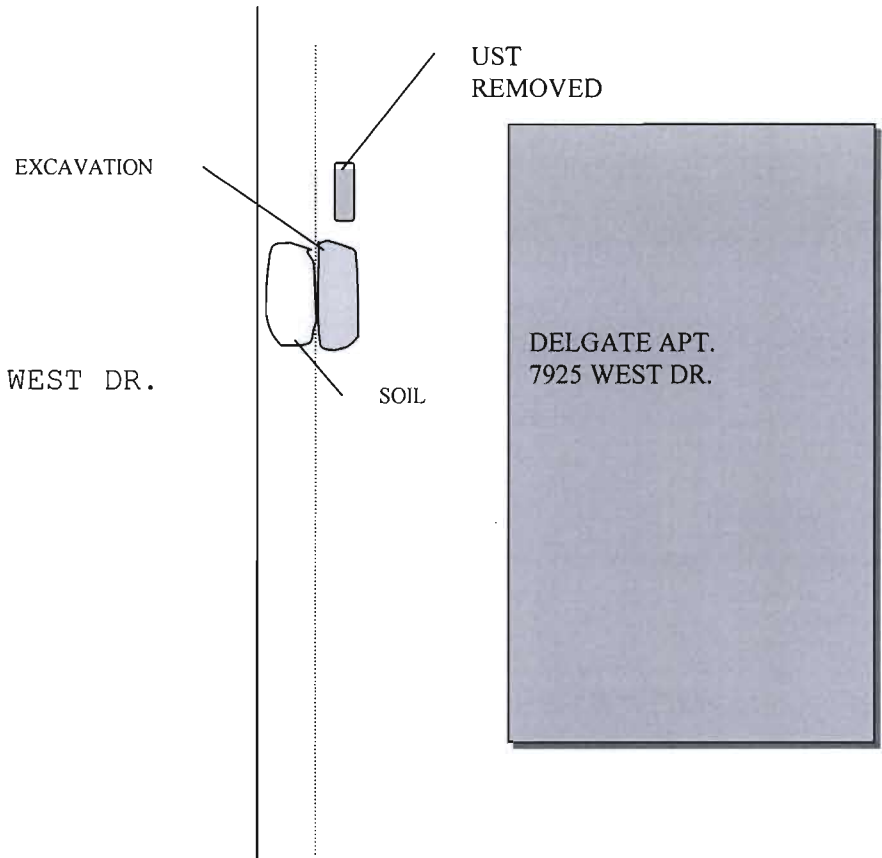

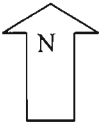

SAMPLES: The following sample was obtained per QAP procedures:
The soil sample was obtained from the bottom of the excavation.

SAMPLE OBTAINED	BLUE CARD NUMBER	TIME SAMPLE OBTAINED
FL-PRO (SOIL)	231625	2:07 P.M.

OVA READINGS: highest reading was 190 ppm at the bottom of the excavation.

UST DISPOSAL: tank would be taken to Phils Scrap Metal according to Mr. Bagwell.

See attached photos and sample results.

TECHNICAL GUIDANCE
Pollution Remediation Section

STORAGE TANK SYSTEM REMOVAL AND ABANDONMENT GUIDELINES

The following conditions and recommendations are hereby incorporated as part of the storage tank system removal and abandonment application (also known as storage tank system closure application). Additional approval(s) may be required from other DERM sections, the local fire department and other governmental agencies having jurisdiction over the facility or scope of work.

1. DERM STORAGE TANK SYSTEM REMOVAL AND ABANDONMENT APPLICATION

The application is valid for six months from the application submittal date and required to be submitted prior to performing any work on site. However, scope of work must be implemented in accordance with any regulatory timeframes.

2. INSPECTIONS

All inspections must be scheduled with the DERM Storage Tank Section (STS) Inspection Coordinator at (305) 372-6716 two business days prior to commencing any closure activities. Closure activities shall include removal or abandonment for underground storage tanks (UST), aboveground storage tanks (AST) and all piping. The inspections shall be scheduled prior to:

A. Underground tank or piping removals:

1. Completion of the tank or piping removal from ground. Be advised that groundwater must be made accessible for the inspector

B. Aboveground tank or piping removals:

(at each applicable stage of removal process to document the progress and any potential contamination)

1. Completion of tank removal
2. Completion of the secondary containment removal

C. Tank or piping abandonment in place:

1. Inspection of the clean inert UST
2. Collection of any soil or groundwater samples (split sampling with a DERM Inspector is required)
3. Filling of the UST with 3000 psi concrete slurry or FDEP approved cellular concrete foam

3. QUALIFICATIONS AND REQUIREMENTS

A. All work for UST closures, including all applicable safety requirements, must be performed by a Pollutant Storage System Contractor (PSSC) possessing a valid license from the Florida Department of Professional Regulation. This is strongly recommended for AST closures.

B. All work for any closure must be performed in accordance with the applicable requirements of Chapter 24 of the Miami-Dade County Code, Chapter 62-761 of the Florida Administrative Code (FAC), and the United States Occupational Safety and Health Administration (OSHA). The DERM recommends that American Petroleum Institute (API) Recommended Practice #1604, and National Fire Prevention Association (NFPA) Standard #30 be followed, if applicable. Also, all work shall meet any requirements imposed by the fire department or any other governmental agency having jurisdiction over the facility.

Storage Tank System Removal and Abandonment Guidelines
October 26, 1999
Page 2 of 3

4. DISPOSAL

- A. Underground Piping
 - 1. All piping must be capped, removed, or filled with concrete, and all applicable vent risers removed
 - 2. All components for underground piping must be drained
- B. Tank System
 - 1. Any UST and AST components removed should be properly cleaned, marked, and disposed of in accordance with API #1604 and NFPA #30, as applicable
- C. Contents (including liquid wastes, decontamination wastewater and sludges)
 - 1. Must be properly recovered prior to commencing any closure activities and disposed of within sixty days by a licensed waste hauler as follows:
 - a. For liquid waste materials by a DERM Permitted Liquid Waste Transporter
 - b. For solid waste materials in accordance with an approved DERM Solid Waste Disposal PlanFor more information, DERM Liquid Waste Transporter Program Manager and Solid Waste Program Manager, (305) 372-6804

5. CONTAMINATION

- A. Discovery of any previously undocumented soil or groundwater contamination
 - 1. Within one day, notify the DERM Storage Tank Section (STS) Inspection Coordinator at (305) 372-6716
 - 2. Submit a properly completed Florida Department of Environmental Protection Discharge Reporting Form #62-761.900(1) to the DERM STS
 - 3. Per Sections 376.305(1) and 376.3071(5)(c), F.S. and Rule 62-761.820, FAC, the owner or operator must "immediately undertake to contain, remove, and abate the discharge".
- B. Discovery of any previously documented soil or groundwater contamination:
 - 1. For free-floating product in an excavation, the DERM recommends recovery and disposal as stated above in section 4.C.1.a.
 - 2. For all excavated contaminated soil (as defined by Chapter 62-770, FAC, effective date August 5, 1999), the DERM recommends disposal as stated above in section 4.C.1.b. if the removal will significantly impact the restoration requirement of the site

6. DEWATERING

If the excavation water is contaminated and dewatering is to be performed, a pretreatment system must be proposed for groundwater restoration. Contact the DERM Pollution Remediation Section at (305) 372-6700 for pretreatment information. Be advised that a Class V permit will be required in addition to a dewatering permit.

Storage Tank System Removal and Abandonment Guidelines
 October 26, 1999
 Page 3 of 3

7. CLOSURE REPORTS

- A. For UST and AST closure systems subject to the requirements of Chapter 62-761, (FAC), pursuant to Chapter 62-761.800 (4)(a) then,
1. A Tank Closure Assessment Report (TCAR) prepared in accordance with the current Florida Department of Environmental Protection's "Pollutant Storage Tank Closure Assessment Requirements" (April 1998 or newer) must be submitted to the DERM PRS within sixty days of the closure if no evidence of contamination is detected.
 2. For UST closures, a FDEP Underground Storage Tank Installation and Removal Form for Certified Contractors #62-761.900(5) must be completed and submitted directly to the FDEP, and a copy to this office, within thirty days of the UST removal.
- B. For UST systems not subject to the requirements of Chapter 62-761, FAC (i.e., residential, on-site consumptive use heating oil, or hydraulic lift), or exempt from a Chapter 62-761, FAC, TCAR pursuant to Chapter 62-761.800(4)(b), the following must be submitted to the DERM PRS within sixty days of the UST system closure: receipts and manifests documenting the proper disposal of all liquid and/or solid wastes (including any applicable UST system components), any soil and groundwater sample results, and if no contamination was detected, a proposal for abandonment of any remaining monitoring wells. However,
1. For abandonment in place of USTs, samples must be analyzed for the appropriate analytical group (as defined by Chapter 62-770, FAC, or other analytical group as appropriate by the type of product)
 - a. Groundwater analyticals must be collected from monitoring well (s) (MW) as follows:
 1. 1,100 gallons or less requires 1 MW
 2. greater than 1,100 gallons requires 4 MWs
 - b. Soil samples must be collected from soil borings (s) (SB) as follows:
 1. 1,100 gallons or less requires 2 SBs
 2. greater than 1,100 gallons requires 4 SBs
 One soil analytical in each source area required

Be advised that temporary or permanent wells installed at a site shall not be removed or abandoned until site closure is granted.

FOR THE CONTRACTOR OR CONSULTANT REPRESENTATIVE TO COMPLETE:

Pollution Remediation Section**STORAGE TANK SYSTEM REMOVAL AND ABANDONMENT PLAN
PROCESSING CHANGE****Purpose:**

The Pollution Remediation Section's (PRS) continued proactive strategic planning to streamline plan review delays has identified the review process for storage tank and piping removal and abandonment activities as a task well suited for streamlining. The streamlining proposal is a notification process, instead of the formal plan review process, that will allow the following:

1. More efficient turnaround time for the department which will benefit the public and
2. Elimination of after-the-fact departmental notification of closure activities.

Implementation Procedure:

1. Effective date, November 1, 1999, a six (6) month pilot test will be implemented by the PRS
2. Completed forms (Storage Tank System Removal and Abandonment Application and Guidelines) will be accepted at the 7th floor front desk by the On-Call Engineer during the Pilot Test
3. A processing fee of \$60, instead of the \$275 fee for the formal plan review, will be required during the pilot test period (subject to change thereafter)
4. Inspections must be scheduled with the DERM Storage Tank Section Inspection Coordinator at (305) 372-6717 or in person (7th floor), after the completed forms have been submitted
5. For emergency cases (i.e., previously unknown tank discovered during construction) the DERM Storage Tank Section Inspection Coordinator should be contacted immediately and the completed forms must be faxed, (305) 372-6729, or delivered to the STS Inspection Coordinator (on the 7th floor) prior to removal
6. Comments and Suggestions form will be provided for public use

Miami-Dade County DERM

RE: Tank Contamination Assessment Report
Delagate Apartments
7925 West Drive
North Bay Village, Florida

As authorized, Hydrologic Associates U.S.A., Inc., (HAI) has completed the Tank Closure Assessment Report at the above referenced subject site. The attached report documents the results of the assessment and our recommendations.

Should you have any questions or comments regarding this submittal, please feel free to contact our Miami office. Thank you for your assistance with this project.

Sincerely,

James T. Miller, P.E.
Project Manager

1.0 INTRODUCTION

Hydrologic Associates USA, Inc. (HAI) was contracted to supervise the removal and proper disposal of one steel 275-gallon underground storage tank (UST) which formerly contained diesel fuel oil for the subject site. This document has been compiled pursuant to the criteria established by the Florida Department of Environmental Protection (FDEP) and the Pollutant Storage Tank Closure Assessment Requirements. All tank closure assessment activities were performed in accordance with HAI's FDEP approved comprehensive Quality Assurance Plan (CompQAP #900326).

The UST was removed from the site on August 4, 2000. The UST was observed to be in poor condition (with small visible holes on the bottom) at the time of removal. The soil adjacent to the bottom of the tank were excessively contaminated (OVA > 10 ppm), therefore it was drummed and properly disposed. No free floating product was encountered during the removal activities.

2.0 SITE DESCRIPTION AND BACKGROUND

The site is situated within Section 09, Township 53South, Range 42East, Miami, Florida. Refer to Figure 1, for a USGS map indicating the location of the site. The surrounding area is primarily characterized by residential development. The UST was reportedly installed during the 1970's. The UST was oriented on an north/south axis located approximately 12-feet west of the building. Refer to Figure 2, for the location of the UST.

3.0 UNDERGROUND STORAGE TANK REMOVAL

On August 4, 2000, HAI personnel supervised the removal of the UST. A representative of Dade County Department of Environmental Resources Management (DERM) was also on site to perform the tank closure inspection. The UST and associated piping were removed by Bagwell Equipment Company. Prior to removal, residual fuel oil was removed from the tank and lines. The tank was then made inert with compressed air and checked for lower explosive levels (>5% L.E.L.) with a Bacharach Model G Sniffer, Combustible Gas Detector. Once removed, the interior of the tank was pressure cleaned. There was some minor evidence of holes and pitting on the bottom of the tank. Approximately 150 gallons of used diesel, sludge and petroleum-contaminated rinse water were pumped out of the tank by Cliff Berry, Inc. The tank and associated piping were then transported to Phil's Metal Salvage for disposal (08/05/2000). Refer to Appendix A for a copy of the manifests for the disposal of the tank contents and the tank.

4.0 SOIL QUALITY ASSESSMENT

During the UST removal, HAI continuously monitored soil conditions using an Organic Vapor Analyzer (OVA) equipped with a Flame Ionization Detector (FID) for total petroleum vapor and methane content. Fuel oil was stored in the UST, therefore, a target concentration of 10 parts per million (ppm) was employed to establish the presence of "excessively contaminated" soil. Soil samples were collected from the sides and bottom of the excavation. The approximate dimensions of the excavation were 4 feet (east-west) by 7 feet (north-south) by 4 feet deep. Samples were collected from the excavation and screened for organic vapors. The soil samples were analyzed with an OVA in accordance with Chapter 62-770, FAC. Excessively petroleum-contaminated soil (>10ppm) were encountered. Refer to the Table Section of this report.

The soil exhibiting elevated levels of contamination were removed and placed in three steel 55-gallon drums. The drums were incinerated at the CRS Rinker facility. The excavation was then retested with the OVA. The sample with the highest detected OVA reading was collected for analysis (bottom of excavation). The soil sample was collected from the bottom of the excavation with a stainless steel split spoon and an encore sampler. In addition, an 8-ounce glass jar was also filled with the sample. The sample was then packed in an ice-filled cooler and sent to the laboratory for analysis. The soil sample collected was analyzed for volatile organic aromatic, polycyclic aromatic hydrocarbons and total recoverable petroleum hydrocarbons.

The following table summarizes the soil concentrations encountered, refer to Appendix B for a copy of the complete laboratory data and chain of custody.

TABLE I

Boring ID	BTEX	Total Naphthalene	Total Remaining EPA 8100 Parameters	MTBE	FL PRO
SB-1	BDL	BDL	BDL	BDL	84
Criteria	NA	1000	N/A	350	350

Notes:

BDL - Below Detectable Levels
Samples collected 8/23/00
Soil Target Levels - FDEP 62.777
All Concentrations in mg/kg
N/A - Not Applicable

5.0 GROUNDWATER QUALITY ASSESSMENT

The groundwater was not encountered during the removal activities. Therefore, excavation was backfilled with clean fill and a monitoring well was installed in the center of the excavation (figure 2A well construction detail). No free product or odor was noted in the sample. Figure 2 shows the location of the monitoring well.

The newly installed monitoring well is a two inch diameter (schedule 40 PVC casing) 12 foot shallow well. A water tight cap with a lock were placed on the well. Groundwater was encounter at 6.5' below land surface.

Prior to sampling, the monitoring well (MW-1) was purged of approximately five well volumes of groundwater. The sample was collected with a decontaminated Teflon bailer. The groundwater sample was collected and analyzed for the volatile organic aromatics (including total xylenes) and MTBE, and polycyclic aromatic hydrocarbons. As indicated in the laboratory analysis, no parameters were present above detectable levels. Refer to Appendix C for a copy of the complete laboratory data and chain of custody.

6.0 QUALITY ASSURANCE PLAN

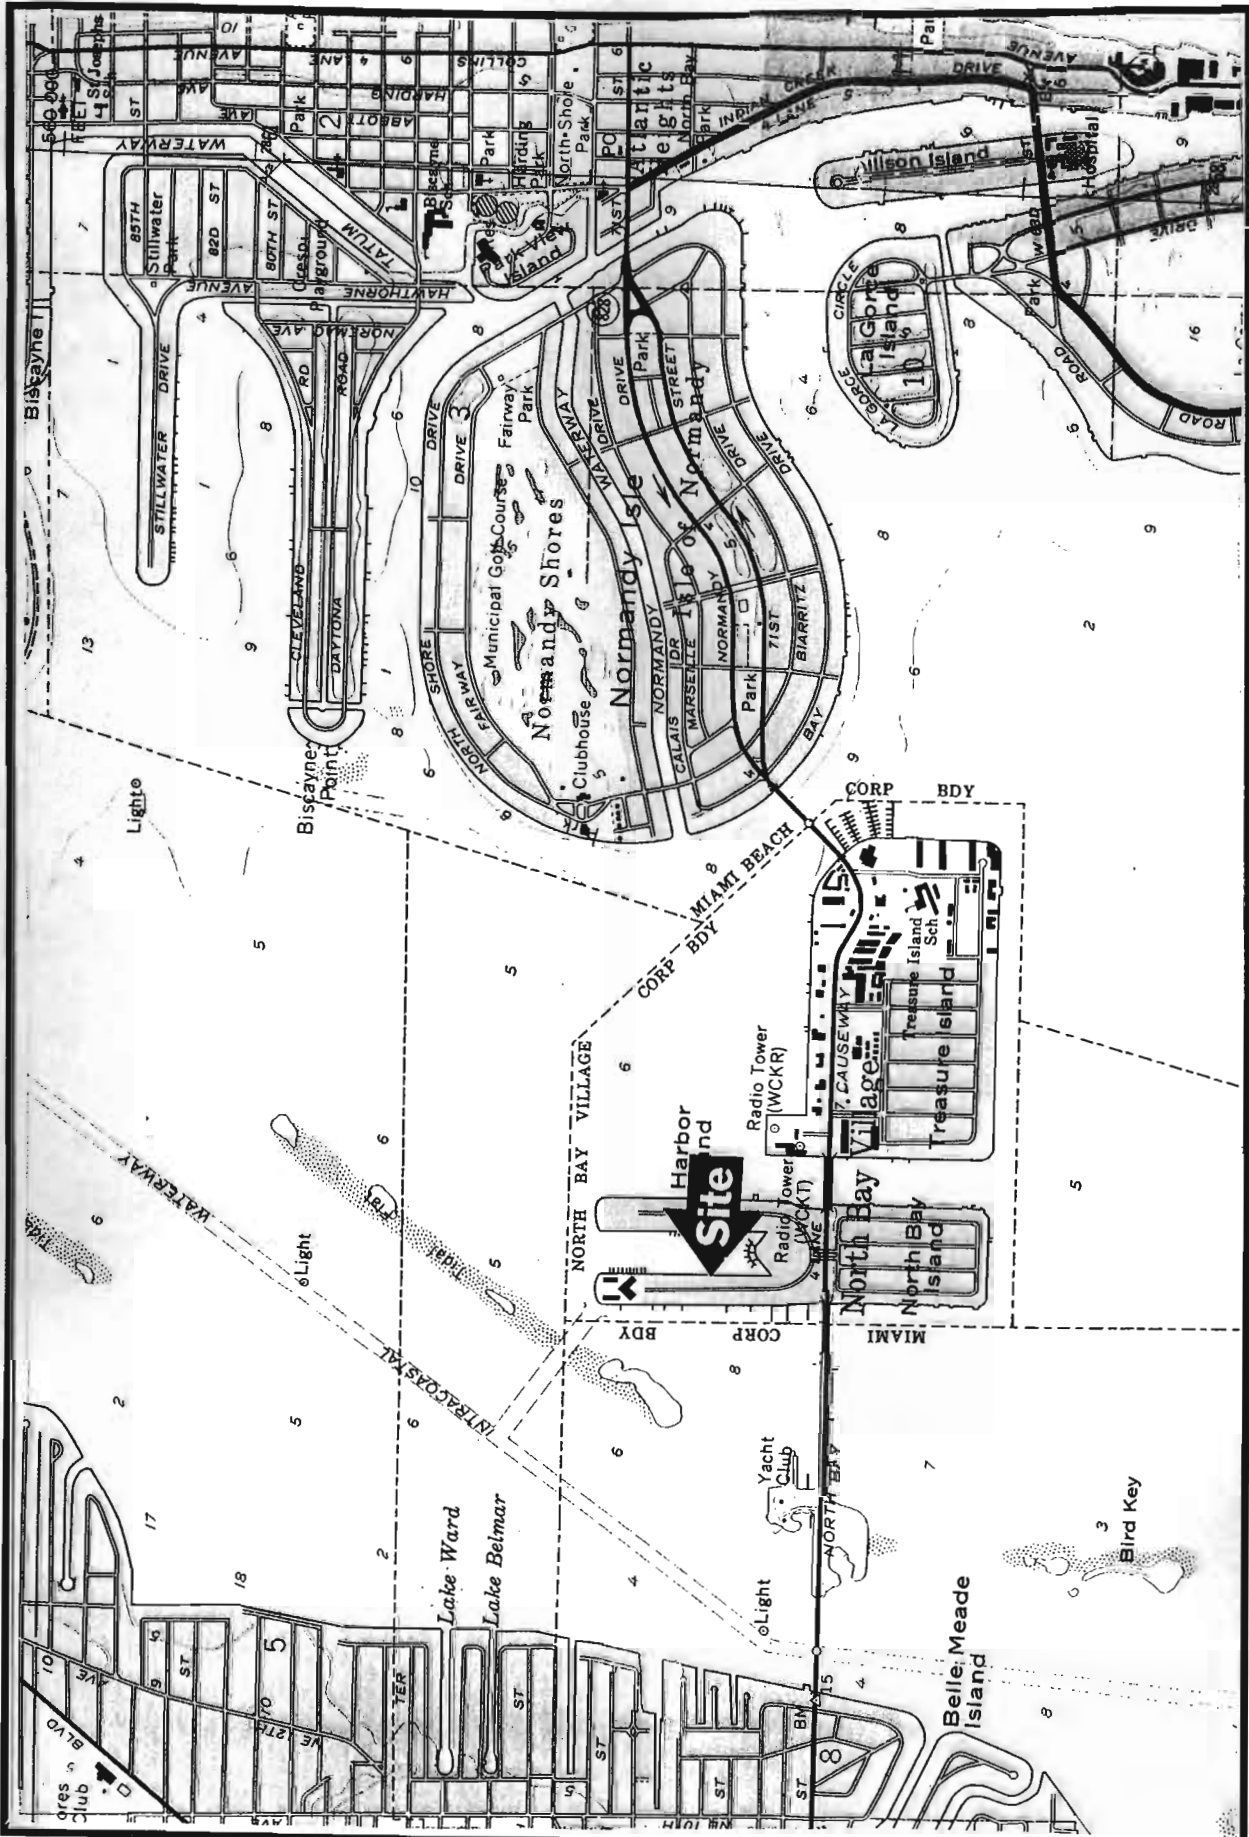

Soil and groundwater samples were collected in accordance with Hydrologic Associates, Inc., approved Comprehensive Quality Assurance/Quality Control Plan, FDEP number 900326. Samples were delivered with accompanying chain of custody forms, to US Biosystems for analysis, an FDEP approved laboratory with an HRS Certification.

7.0 CONCLUSION

The 275-gallon UST was removed from the site on August 4, 2000. The UST was in poor condition at the time of removal, some holes were observed on the bottom of the tank. The soil adjacent to the tank that exhibited elevated OVA readings (OVA >10 ppm) were removed and incinerated (3-drums). As indicated in the laboratory data and the OVA field screening, no contaminated soil or groundwater are present above criteria.

Based on this information, no additional assessment is warranted, therefore, Hydrologic Associates respectfully recommends no further action (NFA) for this facility.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Universal Engineering Sciences were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 16C8-4221-9379

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Universal Engineering Sciences (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Interview Record

Project Name: Proposed North Bay Village Residential Building

Project No.: 2140.1700014.0000

Report No.: E00119

Interview Date: March 20, 2017

Interviewee: Mr. Maurizio Pejoves

Relationship to Site: Subject Property Owner, P&O Technologies, Inc.

Comments: UES interviewed Mr. Maurizio Pejoves, Owner of the subject property on March 20, 2017. He stated that he purchased the subject property in 2015. Mr. Pejoves stated that the previous owner began to redevelop the subject property but due to financial constrains, could not complete the construction of the new building. The fragments of poured concrete, the excavation pit in the center of the subject property and steel rebar sticking out of the ground that are present today are from the previous owner. Mr. Pejoves added that he is not aware that the subject property was developed with three apartment buildings in the past. He is not aware of any USTs, ASTs or any other storage or use of petroleum products or hazardous materials at the subject property. He is not aware of any environmental cleanups that have taken place at the subject property. He is not aware of any environmental liens or activity and use limitations on the subject property that are filed or recorded under Federal, Tribal, State or local laws. He is not aware of any contamination present at the subject property.

.Interviewer: Leigh Marshallsay

UNIVERSAL
ENGINEERING SCIENCES

**LEIGH MARSHALLSAY, BSc, M.A.
ENVIRONMENTAL PROJECT MANAGER****PROFESSIONAL EXPERIENCE**

Mr. Marshallsay is a Project Manager for Universal Engineering Sciences, Inc. Miami Office and has approximately five years of consulting experience. His duties include the performance of Phase I environmental site assessments (ESAs) including site reconnaissance, aerial photography review, regulatory agency file reviews, and report preparation. He has performed approximately 100 Phase I ESAs ranging from vacant parcels and former landfills to gas stations. Mr. Marshallsay also manages projects such as Phase II ESAs, remedial action plans, and contamination assessment reports.

His experience extends to: conducting Stormwater Pollution Prevention Plan (SWPPP) inspections for commercial and residential developments; assisting with Project Development and Environment (PD&E) projects such as impact reviews and construction plan reviews of Florida Department of Transportation (FDOT) projects; and evaluating air quality, reporting findings, and recommending a course of action. As a certified Florida Department of Environmental Protection (FDEP) Stormwater Pollution inspector, Mr. Marshallsay has the knowledge of federal, state and local permits which enables him to review SWPPPs, a requirement for the National Pollution Discharge Elimination System (NPDES) Generic Permit. Mr. Marshallsay is also an asbestos hazard emergency response act (AHERA)-Accredited Asbestos Inspector.

RELEVANT PROJECT EXPERIENCE**Terracon Consultants, Inc: *City of Hallandale Beach Proposed Public Water Supply Well, Hallandale Beach, Florida***

A Phase I ESA was performed, consistent with the procedures included in ASTM Practice E1527-13, for the approximately 2.75 acres consisting of two parcels. Based on historical use of the site as a borrow pit for approximately 20 years, the use of backfill from unknown sources, the former borrow pit represents a REC. Based on historical use of the adjoining west property as a historical dump, that was apparently unregulated, documented groundwater cleanup target level (GCTL) exceedances of ammonia concentrations in groundwater samples and lack of information regarding the disposed materials, the old dump represents a REC. Based on the evidence of a petroleum release during the removal of the 2,500-gallon underground storage tank (UST) at an adjoining property, this facility was also considered to represent a REC. Based on the scope of services, limitations, and findings of the assessment, the report recommended additional subsurface investigation be conducted to evaluate potential impacts from the RECs identified.

Terracon Consultants, Inc: *Private Client, Homestead, Florida*

A Phase I ESA was performed, consistent with the procedures included in ASTM Practice E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, for the approximately 24.2-acre vacant site. Recognized Environmental

Conditions (RECs) were present at the property: the application of organochlorine termiticides to soil at the former on-site military housing structures; and the historical usage of agrichemicals within the northern portion of the site from sometime after 1952 until the military housing structures were constructed between 1968 and 1973. The report recommended that a subsurface investigation be conducted to evaluate potential impacts due to prior usage.

Terracon Consultants, Inc. *Financial Institution Asbestos Roof Survey – Miami, Florida*

Responsible for providing asbestos inspection services for a financial institution. The survey was requested prior to the planned roof removal and replacement activities. The limited roof sampling was conducted by Mr. Leigh Marshallsay, an AHERA-accredited asbestos inspector in general accordance with the sampling protocols established in Environmental Protection Agency (EPA) 40 Code of Federal Regulations (CFR) 763 to identify suspect ACM.

Stantec Consulting: *Golden Glades Interchange, Miami, Florida*

The project consisted of Type 2 Categorical Exclusion including mapping alternative gas line locations and contamination sites using ArcGIS.

Stantec Consulting: *Okeechobee Road, Miami, Florida*

Furnished a Contamination Screening Report for the project. The scope of work included mapping of the project corridor and creating an address locator in order to geocode addresses of Department of Environmental Resources Management (DERM) and FDEP contaminated sites using ArcGIS.

RICHARD E. CARMAN**Corporate Director of Environmental Services**

Mr. Carman has more than 22 years of multidisciplinary experience as a manager of safety, remediation, facility management, and environmental services. He has conducted numerous underground storage tank (UST) closures, Phase I Environmental Site Assessments (ESAs), Phase II ESAs, soil gas surveys, landfill closures and remedial activities at sites throughout Florida, Georgia, Ohio, Pennsylvania, Kentucky, Maryland, North Carolina, South Carolina, Alabama, and Tennessee. In addition, Mr. Carman has provided site investigation and remedial activities for a large acquisition firm for over 15 projects located throughout North America and Canada. Mr. Carman also has extensive experience in field activities involving the Florida Department of Environmental Protection (FDEP) Early Detection Incentive Program, FDEP Dry Cleaning Solvent Release Program, FDEP Voluntary Cleanup Agreement Program, Georgia Environmental Protection Division (GAEPD) Hazardous Site Response Act (HSRA) Program, Ohio Environmental Protection Agency (OEPA) Voluntary Action Program, the State of Ohio's Bureau of Underground Storage Tank Regulations program, the Pennsylvania Department of Environmental Protection (PADEP) Act 2 program, the Tennessee Department of Environment and Conservation (TDEC) Voluntary Cleanup, Oversight and Assistance Program (VOAP), and the South Carolina Department of Health and Environmental Control (SCDHEC) Voluntary Cleanup program.

Mr. Carman has served as a geologist/project manager for several large oil companies, numerous law firms, several large industrial facilities, a large retail pharmaceutical company, and at over 30 voluntary action sites in Florida, Georgia, Ohio, South Carolina, Tennessee, Pennsylvania, and Canada. He has working knowledge of regulatory guidelines and requirements affecting health, safety and environmental management and remediation, including the United States Environmental Protection Agency (USEPA), Toxic Substances Control Act (TSCA), Occupational Safety and Health Administration (OSHA), FDEP, GAEPD, OEPA, Canadian Environmental Assessment Agency (CEAA), PADEP, SCDHEC, North Carolina Department of Environment and Natural Resources (NCDENR), Alabama Department of Environmental Management (ADEM), and TDEC VOAP.

Mr. Carman has conducted more than 250 comprehensive health, safety and environmental regulatory compliance audits, environmental risk and liability studies, facility closures, and due diligence/property transfer assessments at commercial sites, industrial manufacturing plants and hazardous waste sites throughout North America and Canada.

Years of Experience

Since 1993

Richard's Previous Employment Includes:

Site Assessment Report Investigation and Remedial Design

Former Design and Manufacturing Facility – Tampa, Florida

Mr. Carman is worked with the former owner of a property that operated a design and manufactured decorative laminates facility for the transportation industry. The site is being investigated for several documented releases associated with chlorinated solvents, heavy petroleum, and heavy metals. Current site activities include the investigation of a former solvent dumping pit, two former methyl-ethyl-ketone (MEK) USTs with documented releases, an unauthorized onsite landfill, and a release of heavy oils from a former onsite boiler system. Mr. Carman is overseeing site investigation activities in order to submit a formal SAR investigation to the FDEP. Upon SAR approval, a Remedial Action Plan will be developed and submitted to the FDEP for approval. The anticipated corrective actions will include source removal, with associated risk-based closure controls and long-term groundwater monitoring. Mr. Carman has instituted numerous measures through the site investigation activities in order to control costs and work within the boundaries of an escrow account that has been established by a previous owner to address site investigation and corrective actions at the site.

Site Assessment Report Investigation and Soil Management Plan

Former Westview Country Club – Miami, Florida

Mr. Carman worked with a national development company and the Miami-Dade County Environmental Resources Management Department (DERM) to conduct subsurface investigation and corrective action activities for the redevelopment of a 180-acre former golf course site in Miami, Florida. Initial SAR activities included the advancement of over 150 soil borings and 35 permanent monitoring wells across the site. Initial findings indicated that several areas of the site contained soil and groundwater impacts above regulatory criteria for arsenic and pesticides. Several additional rounds of site assessment were completed and it was demonstrated the chemicals of concern were defined to the interior of the subject property boundaries. Based on the planned redeveloped of the site for large-box warehousing, a combined risk-based and engineering control corrective action plan was developed and submitted to the DERM. The corrective action plan consisted of three criteria: 1.) source removal and offsite disposal of impacted arsenic and pesticide soils near the former maintenance area and future location of a public park; 2.) soil management of arsenic impacted soils throughout the 180-acre site where impacted soils would be managed onsite by removal and relocation to areas beneath future building pads and planned undisturbed areas; and, 3.) additional monitoring well installation and long-term groundwater monitoring. In an effort to save the client money, the onsite soil management was designed to coincide with future construction activities to minimize the double-handling of soils. Upon DERM review, the plan was approved with minimal comments and needs for additional assessment activities. In addition the SAR was approved. The implementation of the corrective actions is planned for early 2017, pending the overall development plan is approved by Miami-Dade County.

Phase I Environmental Site Assessment, Subsurface Investigation, Asbestos Abatement, and Site Decommissioning

PNC Bank – Deerfield Beach, Florida

Mr. Carman was retained by a national banking institution to assist with the foreclosure of a commercial property in Southeast Florida. Prior to the bank foreclosing, Mr. Carman conducted a Phase I Environmental Site Assessment for the site. The site consisted of an abandoned multi-story motel and associated restaurant. While conducting due diligence, a review of a historic aerial photograph depicted the presence of a former onsite filling station adjacent to the current onsite abandoned restaurant. Mr. Carman directed a subsurface investigation through the installation of soil borings/temporary monitoring wells and the deployment of a geophysical survey to evaluate for the presence of USTs and subsurface features associated with the former onsite filling station. Soil and groundwater analytical results indicated the presence of a petroleum release in the vicinity of the former filling station. In addition, the

geophysical survey indicated the presence of three USTs in a single cavity and an associated product delivery line. It was determined that the extent of subsurface soil and groundwater impact was minimal, therefore the bank foreclosed on the property. Shortly after, Mr. Carman assisted the bank with a local government ordered site decommissioning of the onsite structures. Mr. Carman directed an asbestos survey and abatement of the two onsite buildings. Upon completion of the abatement activities, Mr. Carman directed the building demolition and offsite disposal of the materials. The site was graded and vegetated to assist with storm water control. The entire asbestos abatement and decommissioning project was completed within 60 days of authorization, which was in compliance with the local government requirements placed on the bank. Based upon these activities, the bank was able to sell the property to a regional development firm for redevelopment as a mixed residential-commercial use. Upon commission planning approval for the redevelopment project, the local developer will remove the existing USTs and perform a SAR investigation in accordance with FDEP regulations.

Site Assessment Report Investigation, Source Removal, and Groundwater Monitoring Program

Tropitone Furniture Facility – Sarasota, Florida

Mr. Carman has assisted a West-Central Florida based furniture manufacturing facility with a documented release since 2006. The release was discovered during environmental due diligence activities as part of a bank refinancing. Initial assessment activities identified arsenic and nickel impacts to soil in the vicinity of an onsite painting operation. In addition, site-wide groundwater impacts from metals and chlorinated solvents, including 1-4, dioxane, were identified. Over a two year time period, assessment activities were conducted to define the extent of soil and groundwater impacts. Chlorinated solvent impacts were identified on an adjacent county right-of-way drainage feature and the adjacent industrial property. Assessment activities were completed and several groundwater contaminant plumes were identified on the site as well as the adjacent properties. A long-term groundwater monitoring program was initiated with quarterly groundwater sampling activities and reporting to the FDEP. Shortly after the groundwater monitoring program was initiated, the onsite paint shop caught fire and was destroyed. The client decided to convert this portion of the site to a gravel parking lot. Mr. Carman assisted through the process and performed a soil source removal prior to the parking lot being developed. The source removal eliminated impacted soils beneath the site and the focus became long-term groundwater monitoring for five years. Upon the completion of the fifth year of groundwater monitoring, Mr. Carman worked with the FDEP to suspend the groundwater monitoring program and pursue a risk-based closure program. Mr. Carman worked with a team to develop a closure plan that included deed and use restrictions for the subject site, and the two adjacent properties that had been impacted. Through several rounds of negotiations with all vested parties, a proposed closure plan was developed and presented to the FDEP. It is anticipated that the FDEP will grant formal site closure in early 2017.

Landfill Closure Design

Florida Environmental Resources Corporation Landfill Facility – Tampa, Florida

Mr. Carman worked with a national insurance provider and the FDEP to develop and implement a Voluntary Cleanup Agreement to cap and close an abandoned construction debris landfill. The closure activities will be conducted under a voluntary effort by the insurance company since the landfill facility has been abandoned by the property owner and landfill operator. Mr. Carman conducted a comprehensive evaluation of the historical operations at the facility. In order to complete the closure requirements within the insurance policy values, numerous closure options were developed and evaluated. The most cost effective closure option was to place two feet of mulch and organic fill material across the 5.5-acre facility and then cover the cap with seed. Additional closure design considerations included monitoring well installation and abandonment, repair of storm water conveyance ditches around the facility, removal and offsite disposal of illegally dumped materials that are present on the property, and a slope design to allow storm water to properly drain across the landfill area. In addition to the closure activities, a post closure care plan was developed by Mr. Carman. The landfill closure and post closure care plans were approved by the FDEP. Field activities for the capping of the landfill will be implemented in the near future.

Site Assessment Report Investigation and Groundwater Monitoring Program*Former Dollar Thrifty Automotive Group Facility – Orlando, Florida*

A national rental car company retained Mr. Carman to perform a SAR investigation at a former rental car facility located in Central Florida. A documented release was recorded with the FDEP based upon the closure of a gasoline UST system that had been operated on the site. After closure of the UST system, initial assessment activities were performed to assess the UST release. After several rounds of soil boring and monitoring well installation, subsurface impacts were delineated. In order to remediate identified soil impacts and improve the effectiveness of a groundwater monitoring program, source removal activities were performed and approximately 500 tons of petroleum-impacted soils were removed from the site. Upon completion of source removal activities, a long-term groundwater monitoring program was implemented. Over a five year time period, a network of 18 monitoring wells were sampled on a quarterly basis. Through that time, Mr. Carman presented alternative closure options to the client to reduce the amount of time it would take to achieve site closure from the FDEP. However, the client decided to continue with long-term groundwater monitoring based on financial reasons. Ultimately, Mr. Carman was able to work with the FDEP to reduce the groundwater monitoring effort to semi-annually for the final two years of the monitoring program. During the seventh year of the monitoring program, Mr. Carman was able to demonstrate plume stability and reduction in contaminant concentrations in the groundwater. Ultimately, the FDEP granted site closure and the monitoring well network was removed from the site.

Self-implemented PCB Remediation*Mid-Atlantic Commercial Properties Group, Inc. – Oakland Park, Florida*

A Florida-based development company retained Mr. Carman to conduct site investigation activities and remedial actions for a hydraulic lift system release site in Southeast Florida. Mr. Carman directed subsurface investigation activities and remedial actions in conjunction with the redevelopment of the commercial property. As part of the soil assessment and remedial activities, a polychlorinated biphenyl (PCB) release was discovered on the site. Mr. Carman coordinated with the USEPA Region 4 District Office and the Broward County Department of Planning and Environmental Protection to develop a Self-implemented PCB Cleanup program. In order to develop the Self-implemented PCB Cleanup program, the site was classified as a high occupancy commercial property, thus establishing a risk-based cleanup objective for site closure. Mr. Carman managed numerous subsurface investigations to delineate the vertical and horizontal extent of the PCB impacts. Once delineation activities were completed, a Remediation Work Plan was submitted to and approved by the USEPA for a Self-implemented Cleanup. Remediation activities consisted of removing the hydraulic lift equipment from the subsurface for offsite disposal. The lift equipment was classified as PCB remediation waste, thus did not require decontamination prior to being transported to a TSCA disposal facility. Mr. Carman directed the removal of 450 tons of soil for disposal at a State-approved, non-hazardous solid waste landfill. The ability to dispose of the soil at the State-approved facility provided a significant cost savings to the client. At the completion of the removal activities, Mr. Carman developed a Completion Activities Report for the site and the developer received a no further investigation status from the USEPA regarding the release. The site was successfully redeveloped as a retail pharmacy store.

Voluntary Site Investigation and Remedial Design*Plastic Injection Molding Facility - Eastern Georgia*

Mr. Carman worked with an auto parts manufacture to conduct subsurface investigation and remedial design activities associated with an industrial property under the GAEPD HSRA program. The investigation focused on a documented release on the property relating to chlorinated solvent impacts associated with a former onsite degreaser. He worked closely with the client and the GAEPD to complete a HSRA release notification and the site has subsequently been listed on the Georgia Hazardous Site Index. Mr. Carman managed site activities that included monitoring well installation, groundwater monitoring, pumping tests, source removal, indoor vapor monitoring, geophysical investigations, and regulatory interaction and negotiation. The investigation focused on an

adjacent residential subdivision with indoor air monitoring to determine what, if any, risks are present to the occupants of the dwellings in the subdivision. He oversaw the installation of vapor mitigation systems in the numerous residential dwellings in the neighborhood. Assessment activities were completed after several rounds of subsurface investigation were conducted. He assisted in the design of a pond liner system to limit exposure of contaminated groundwater from an onsite storm water retention system. The site is currently undergoing corrective action activities.

Site Investigation and Facility Decommissioning Oversight

Robins Air Force Base – Warner Robins, Georgia

Mr. Carman served as a project manager during site investigation and facility decommissioning activities for a large demolition and construction project at Robins Air Force Base. He was responsible for working closely with the demolition/construction contractor, base environmental personnel and the US Army Corps. of Engineers throughout the entire project. Initial activities directed by Mr. Carman consisted of an extensive subsurface investigation within the project work area. Constituents of concern identified included PCBs, chlorinated solvents, and heavy metals. As part of the investigation activities, Mr. Carman was responsible for the development of a soil excavation and waste management plan, as well as the development of a site-specific health and safety plan that would be utilized for onsite activities. Mr. Carman was instrumental in assisting the demolition contractor in segregating, managing and disposing of various waste streams generated during building and soil removal activities. He also coordinated with the various offsite disposal facilities which handled the non-hazardous and hazardous waste streams. Upon completing the demolition activities, Mr. Carman was responsible for developing and implementing onsite worker health and safety monitoring during soil excavation and the installation of subsurface utilities. Activities that were directed by Mr. Carman included location and designation of “Hot” work zones within contaminated areas, daily safety meetings, updating of the health and safety plans, employee exposure monitoring, air monitoring, and evaluation and use of appropriate personal protective equipment for work activities that were conducted onsite.

Voluntary Site Investigation and Remedial Design

Plating Facility - Western Tennessee

Mr. Carman worked with an auto parts manufacture to conduct subsurface investigation and remedial activities associated with an industrial property under the TDEC VOAP. The investigation focused on several documented releases on the property relating to heavy metal and chlorinated solvent impacts associated with former and current onsite plating operations. He worked closely with the client and the TDEC to complete a Remedial Investigation/Feasibility Study/Remedial Action Plan. Additional activities conducted in conjunction with the investigation included an area-wide water well survey and a comprehensive receptor survey. In-situ treatment of a groundwater plume located on the interior of the property through injection of a reducing agent was proposed to address heavy metal and chlorinated solvent impacts to groundwater. In addition, two permeable reactive barriers (PRBs) consisting of granular iron filings to prevent groundwater impacts from migrating offsite in downgradient locations of identified source areas were designed by Mr. Carman. The Remedial Investigation/Feasibility Study/Remedial Action Plan was submitted to the TDEC for review and was approved with minimal comment. The site underwent corrective actions by conducting source removal, installation of the PRBs, and additional assessment activities. Currently, the site is conducting long-term groundwater monitoring for the effectiveness of the PRBs in pursuit of site closure from the TDEC.

Incident Response

BP MC252 Incident Response – Mobile, Alabama

Working under the Unified Response Command Team and General Staff Safety Officers at the Mobile Incident Command Post during the BP MC252 Response, Mr. Carman provided technical expertise to responders, federal government agents and safety officers assigned to work this incident. In this role, he conducted site hazard assessments and analyzed the findings for various response activities across three states, and coached the safety

leads in each state by developing and updating site safety plans. He contributed to and reviewed the Incident Action Plan on a daily basis, updating the 204 work orders with appropriate 208 safety references to ensure safety was included in all operational activities. He was instrumental in observing the response activities which led to the development of safe procedures and work practices for various responders throughout the incident. He was responsible for writing and publishing various safety messages and plans, advising operations and response teams on safety procedures and planning. Mr. Carman participated in numerous offshore safety inspections for working and staging platforms and assisted offshore personnel in development and implementation of safe work procedures and practices.

Voluntary Action Program Management

Industrial Facility – Charleston, South Carolina

A national crane rental company retained Mr. Carman to conduct site investigation activities under a Non-Responsible Party Voluntary Cleanup Contract between the property owner and the SCDHEC. The subject property was historically utilized as a tanker truck cleaning and truck maintenance facility and had documented historic releases. Mr. Carman conducted additional assessment activities to define the extent of PCB, chlorinated solvent and heavy metal impacts at the site. Mr. Carman developed the Non-Responsible Party Voluntary Cleanup Contract Work Plan and submitted it to the SCDHEC on behalf of the client. The Non-Responsible Party Voluntary Cleanup Contract Work Plan was developed for the client prior to their acquisition of the property for redevelopment as a crane rental and repair facility. Through additional investigation, Mr. Carman was able to delineate the extent of subsurface impacts on the subject property and evaluate indoor vapor intrusion concerns for the onsite building. Upon submittal and review, the Non-Responsible Party Voluntary Cleanup Contract Work Plan was approved by the SCDHEC. As part of the risk-based remedial approach, Mr. Carman performed computer modeling to demonstrate that indoor air intrusion from the contaminant plume that extended beneath the onsite building did not present an exposure issue to onsite workers and occupants. In addition, identified PCB impacts in selected areas of the site were contained to the site through capping and engineering controls, thus eliminating offsite disposal activities for this waste stream. Through Mr. Carman's efforts, the property owner was able to receive a release of liability from the SCDHEC for the documented releases associated with the property.

Emergency Response and Remedial Activities

Retail Petroleum Transportation Company – Erie, Pennsylvania

Mr. Carman supervised an emergency response involving a tanker truck accident and associated release of gasoline. As part of the initial response activities, Mr. Carman directed onsite emergency response contractors and coordinated cleanup activities with the transportation company and the PADEP. Upon completion of emergency response activities, Mr. Carman was tasked with managing and implementing an extensive site assessment of the release site. One critical aspect of the assessment was to define the extent of impact to a natural spring and wetland area that was impacted from the gasoline release. The assessment was completed within a three month time period and included the installation of over 100 soil borings and 55 monitoring wells. Upon completion of site delineation, Mr. Carman developed a remedial action plan that consisted of a groundwater treatment system to recover free-phase product and impacted groundwater from the natural spring and wetland area. Mr. Carman oversaw the design and installation of the groundwater treatment system. After two years of system operation and attenuation monitoring, site closure was obtained from the PADEP since monitoring data indicated concentrations of contaminants of concern were below the PADEP direct exposure cleanup criteria for groundwater. Upon completion of remedial activities, Mr. Carman provided litigation support to the transportation company in relation to a law suit brought forward by the property owner of the release site.

Sanitary Landfill Closure*Local Municipality – Northeast Ohio*

Mr. Carman was responsible for assisting a local municipality in Northeast Ohio in the closure of a sanitary landfill facility. The municipality was conducting quarterly groundwater monitoring at the facility under a 30-year post-closure agreement with the OEPA. Annual funding allocated for monitoring activities at the landfill facility was in excess of \$100,000. Over 12 years of monitoring only one monitoring well in a network of 14 wells indicated low levels of chlorinated solvents and heavy metals in the groundwater beneath the site. Mr. Carman was able to negotiate a revised groundwater monitoring program with the OEPA, which was based on a risk-based closure and site-specific groundwater cleanup levels for chemicals of concern. Through his efforts, Mr. Carman saved the municipality over \$2 million in monitoring costs and allowed the landfill to complete post-closure care activities 18 years earlier than originally anticipated. In addition, Mr. Carman evaluated additional post-closure care requirements for the landfill property and was able to bring the closed facility into compliance with OEPA regulations for explosive gas monitoring, leachate control, and quarterly landfill slope failure maintenance.

Remedial Activities*Greenhouse Facility – Green Bay, Wisconsin*

Mr. Carman supervised remedial activities that included the excavation and offsite disposal of petroleum impacted soil related to a former UST release associated with a greenhouse facility located in Green Bay, Wisconsin. He was responsible for coordination with facility managers, remedial contractors, and local regulatory agents throughout the duration of the project. A critical aspect of the project was that impacted soils extended beneath a portion of an onsite building. Mr. Carman was able to work with facility personnel to disassemble a portion of the greenhouse facility to excavate petroleum impacted soil in this area of the site. The entire project was closely supervised by Mr. Carman to assure a high level of safety during excavation under the building foundation, while maintaining the integrity of the building floor and glass walls. Through these extraneous efforts, the entire area of petroleum impacted soil was removed from the site and the client avoided placing a deed restriction on the property as part of the regulatory granted closure.

Groundwater Fate and Transport Modeling*Plastics Manufacturing Facility – Northwest, Ohio*

Mr. Carman managed investigation and remedial activities under the OEPA Voluntary Action Program for a plastic extrusion manufacturing facility located in Northwest Ohio. The investigation and remedial activities were conducted to delineate and remediate two areas of heavy metal impacts to subsurface soil and shallow perched groundwater on the site. Upon completion of investigation activities, remedial actions consisted of source removal and offsite disposal of impacted soils and groundwater. Remedial efforts were successful, with the exception of fully remediating nickel impacts to the groundwater beneath the site. In order to take a cost effective approach to complete remedial actions, Mr. Carman utilized groundwater fate and transport modeling software to generate a computer model to predict the fate and transport of dissolved nickel present in the groundwater beneath a site. The model was able to demonstrate that the nickel would not reach the property boundaries (points of compliance) above the applicable action levels established for the site. Based upon the results of the modeling, Mr. Carman was able to achieve a No Further Action status for the site and the property owner received a Covenant Not to Sue acknowledgement from the OEPA.

Underground Storage Tank Management*Federal Government Vehicle Maintenance Facilities – North, Central and South, Ohio*

Mr. Carman conducted numerous UST system inspections for vehicle maintenance facilities throughout Ohio for a branch of the federal government. Each facility inspection consisted of a comprehensive inspection of the UST system with a focus on compliance issues and operational deficiencies. In addition to the facility inspections, Mr. Carman performed regulatory file reviews for each site in order to identify any violation notices or pending regulatory

finer. He was responsible for bringing each UST system into compliance with federal and state regulations, as well as monitoring ongoing compliance and maintenance of the UST systems. Upon completion of the initial inspections and implementation of a corrective action program, Mr. Carman assisted each facility manager in maintaining their UST system and conducted facility inspections on a semi-annual basis for two additional years.

Underground Storage Tank Installation

Carbon Steel Manufacturing Facility – Cleveland, Ohio

Mr. Carman managed the installation of a 10,000-gallon, split (6,000-gallon/4,000-gallon) UST system for the storage of MEK and acetone for a large carbon steel manufacturing facility in Cleveland, Ohio. He was responsible for the design of the UST system, permitting coordination with the Cleveland Fire Department and the Bureau of Underground Storage Tank Regulation Division, oversight of the installation activities, and training of site personnel in the operation of the UST system. Critical design considerations that Mr. Carman was responsible for included installation of specialized system equipment that was compatible with the contents of the tank, assuring that above grade components were explosion proof, and installing the UST system in close proximity of an onsite building without jeopardizing the integrity of the building foundation. Upon completion of this project, the facility operator was able to begin and receive MEK and acetone in bulk shipments which provided cost savings and eliminated a safety issue of having these chemicals stored above ground and inside buildings onsite.
